

CIO TechWorld Awards Onyx Health as One of the "Top 10 Leading Healthcare Tech Solution Providers - 2024"

Onyx Health is Recognized for making healthcare data speak the same language!

OnyxOS: The Market-Leading FHIR Interoperability Platform

ORLANDO, FL, USA, May 29, 2024 /EINPresswire.com/ -- Healthcare is an industry where the right decisions can save lives, and the wrong ones can wreak havoc. However, making the right decisions often requires a comprehensive view of patient data, which is challenging when healthcare data is stored in various IT systems that follow different data formats. This fragmentation can severely limit a care provider's ability to get a complete picture, as the data essentially 'speaks different languages.' [Onyx Health](#) addresses this interoperability problem with [OnyxOS](#), which seamlessly translates data from any healthcare application into a standardized Fast Healthcare Interoperability Resources (FHIR) format, ensuring that data from different systems speak the same language.

We feel honored to receive this acknowledgment from CIO TechWorld. Every hour that we spend on OnyxOS contributes to moving healthcare to an interoperable world making healthcare better for all."

Susheel Ladwa, CEO, Onyx

CIO TechWorld recognizes the transformative potential of OnyxOS in the healthcare data interoperability space, empowering informed healthcare decisions, and honors Onyx Health as one of the 'Top 10 Leading Healthcare Tech Solution Providers - 2024'.

Expressing his excitement about this recognition, Susheel Ladwa, CEO, Onyx Health, states, "We feel honored to receive this acknowledgment from CIO TechWorld, being recognized as one of the 'Top 10 Leading Healthcare Tech Solution Providers - 2024'. Every hour that we spend on

OnyxOS contributes to moving healthcare to an interoperable world making healthcare better for all."

Eric Hill, the Editor-in-Chief of CIO TechWorld, remarks, "OnyxOS stands firm as the operating system for FHIR, simplifying the connectivity and sharing of health data regardless of its storage location or format—a much-needed solution for the healthcare industry, known for its data interoperability challenges."
