

# FSP TO UNVEIL ITS NEXT-GENERATION PC COMPONENTS AT COMPUTEX TAIPEI 2024

*DISCOVER FSP'S LATEST PSU, PC CASE AND COOLER SOLUTIONS*

TAIPEI, TAIWAN, May 29, 2024 /EINPresswire.com/ -- FSP Group, the world's leading high-performance ODM, modified STD power supply, and PC component manufacturer today, is excited to announce its participation at COMPUTEX Taipei 2024, which will be held from June 4th to June 7th at the Taipei Nangang Exhibition Center.

FSP is poised to showcase an array of consumer-facing products, including brand new PSUs, PC cases, and cooling solutions, each meticulously crafted to meet the demands of modern PC enthusiasts.

## BRAND-NEW PSU SOLUTIONS

FSP's primary COMPUTEX showcase revolves around the all-new VITA, ADVAN, and MEGA series PSUs, engineered to cater to PC users' diverse needs. With an unyielding dedication to uncompromising quality and unparalleled performance, FSP is set to redefine the standards of reliability and efficiency in power supply technology.

The newly released VITA series PSUs are expertly designed to meet the demands of budget-conscious builds with exceptional efficiency and unwavering stability. Offering power efficiency ratings ranging from bronze to gold, these PSUs ensure seamless compatibility with a wide range of system configurations. Certain models boast a silent fan that provides whisper-quiet operation without compromising on cooling performance. Crafted with premium bulk capacitors, the VITA series guarantees unparalleled reliability and longevity, empowering users to construct robust and efficient systems without exceeding their budget.

The all-new ADVAN series PSUs are ideal for gamers and professionals seeking a blend of

performance and affordability. These PSUs are available in Bronze, Gold, and Platinum efficiency ratings and efficiently cater to mainstream gaming rigs and workstations. Select models boast a semi-fanless design for quiet operation at low loads, complemented by sleek black cables with a smart design for effortless cable management. Engineered with multiple voltage protection safeguards and a sleek black matte finish, the ADVAN series PSUs offer both reliability and aesthetics.

Making its debut at COMPUTEX, the MEGA series PSUs are tailored for power-hungry gaming rigs and overclocked systems, offering high wattages ranging from 1000W to 1650W. With efficient designs boasting up to Titanium tier certification, these PSUs ensure superior performance and reliability. The MEGA TI 1650W, titanium high wattage PSU will be the first from this lineup available for consumers. These PSUs provide the utmost power and stability for demanding PC builds and are equipped with FDB fans for silent and reliable cooling and conformal coating for enhanced durability in harsh environments.

#### NEXT-GENERATION PC CASES

At this year's COMPUTEX, FSP will proudly showcase its cutting-edge PC cases tailored for specialized computing needs. Among the highlights is the impressive FSP AI Workstation case – the FSP U700, meticulously designed to meet the rigorous demands of artificial intelligence (AI) computing. This advanced chassis supports dual power supplies, essential for powering multiple high-performance processors crucial for AI applications. With its ability to accommodate multi-GPU configurations, the FSP U700 significantly accelerates AI model training, ensuring enhanced system stability and reliability when combined with the FSP CANNON PRO 2500W power supply. Visitors to COMPUTEX can witness firsthand how these innovative solutions elevate operational stability and reliability in AI computing environments, offering higher efficiency and superior heat dissipation performance to optimize system functionality.

Additionally, FSP's lineup includes gaming PC cases, such as the U690, M580, and S380 models, designed to captivate gamers with their fusion of style and functionality. These cases boast

striking panoramic glass or three-sided glass designs that create visually stunning aesthetics, catering to the diverse preferences of gamers. Beyond their eye-catching appearance, these gaming cases prioritize practical features like efficient heat dissipation, support for liquid cooling systems, and easy cable management. At COMPUTEX, attendees can explore how these gaming PC cases seamlessly blend personalized aesthetics with performance-enhancing functionalities, promising an immersive gaming experience without compromise.

#### ADVANCED CPU COOLING SOLUTIONS

FSP is set to showcase its latest gaming PC hardware at COMPUTEX Taipei 2024, introducing a range of innovative CPU cooling solutions. The lineup includes both air coolers and AIO (All-In-One) liquid coolers designed to meet the varied needs of PC enthusiasts and gamers. The air coolers—NE5, NP5, ME7, and MP7—offer excellent heat dissipation and are engineered to maintain optimal noise levels. Additionally, FSP will also present the AE24 and AE36 AIO coolers. These models, available in 240mm and 360mm sizes, provide superior cooling performance for high TDP setups and feature-optimized mounting kits for easy installation and broad compatibility with most modern CPUs. By offering a range of cooling solutions tailored to different user preferences and system requirements, FSP continues reinforcing its commitment to innovation and quality in PC component manufacturing, further enriching the showcase at COMPUTEX Taipei 2024.

Join FSP at COMPUTEX Taipei 2024 and experience the future of PC power and cooling solutions firsthand. Whether you're a dedicated enthusiast, a member of the media, or an interested client, FSP invites you to visit their booth at Nangang Hall 1, Floor 4, booth no: L1209a. Discover how FSP's latest PSU and cooler technology innovations can elevate your computing experience.
