

Global Value Web (GVW) announces OHDSI India first Sciences Symposium: Mumbai, October 5th 2024

MUMBAI, INDIA, May 31, 2024 /EINPresswire.com/ -- Global Value Web (GVW) and OHDSI India Chapter (pronounced Odyssey) are proud to announce this first-of-its-kind symposium in India, focused on Observational Health Data sciences and Informatics; OHDSI. GVW welcomes stakeholders who are interested in the future of healthcare to participate along with renowned speakers, meet representatives and discuss data driven healthcare in India and globally.

OHDSI Symposium as a part of the Global Digital Health Summit

On 5th of October 2024, OHDSI India together with Global Digital Summit brings together patients, medical specialists and practitioners, government institutions and the industry in one place to set the direction for Digital Health and improve the quality of patient data for global research. The summit provides a global platform to showcase cutting-edge technologies and analytics. It facilitates discussions on large-scale deployment of these new technologies.

The OHDSI symposium, as part of Global Digital Health Summit, will take place at the Jio World Convention Centre in Mumbai, India.

Standardizing data will improve healthcare quality

The main topic of the symposium will be on how we can achieve a validated data set that is ready for research and enables better research objectives in the field of life sciences. According to Louis Hendriks, founder & CEO of GVW, this is the way forward: he says "Secure data gathering, structuring, curation, exchange & analysis of patient data is possible when like-minded individuals and organizations come together. More shared data enables better patient outcomes faster. Converging currently separate data streams into an integrated data stream will increase the speed and quality of medical treatments and result in more effective use of pharmaceuticals, thus better patient outcome."

Renowned speakers, discussions and networking opportunities

The OHDSI India Symposium serves as a convergence point for various stakeholders in healthcare, including patients, physicians, hospitals, researchers and pharmaceutical companies. Renowned speakers from OHDSI Global, OHDSI EU, and other regional OHDSI chapters will share insights and best practices. Their aim is to inspire you and use new ways of thinking to improve healthcare systems in their current imperfect state.
