

# Revolutionary Baytec®SPR Membrane from Taiwan Hydroseal Demonstrates 20 Years of Excellence and Innovation

TAIWAN, TAIWAN,R.O.C., June 1, 2024 /EINPresswire.com/ -- Hydroseal Enterprise Co., Ltd. announces a groundbreaking achievement in the waterproofing industry with its Baytec®SPR waterproof membrane, which has been proven to provide at least 20 years of leakage-free performance. This milestone underscores the product's exceptional durability and reliability, redefining industry standards for long-term waterproofing solutions.

## Baytec®SPR Waterproof Membrane: Sustained Integrity Over 20 Years

Hydroseal's Baytec®SPR waterproof membrane has been extensively validated through real-world applications over the past two decades. Rigorous testing and on-site evaluations confirm that Baytec®SPR maintains its integrity and functionality even after 20 years, with projections suggesting a potential lifespan of up to 40 years based on the aging curve of reactive polyurethane elastomers.

## A Strategic Partnership for Superior Quality

Hydroseal's success with Baytec®SPR is bolstered by a 20-year collaboration with Germany's Covestro (formerly Bayer Material Science). This partnership has enabled the development of a

unique waterproofing system tailored to withstand the challenging subtropical climate of Taiwan, characterized by high humidity, frequent rain, extreme temperatures, and seismic activity.

## Major Projects and Global Reach

Baytec®SPR has been employed in several high-profile infrastructure projects across Asia, demonstrating its versatility and robustness.

Notable projects include:

- Taiwan High-Speed Rail
- Harbin-Dalian High-Speed Rail in China
- Singapore's Underwater Tunnels and Metro
- Singapore's Eco-Link Bridge
- Macau Light Rail C-360

Prominent hotels such as the Taipei Marriott Hotel, Taichung Hoshinoya Hotel, and Singapore's Shangri-La Hotel have also adopted Baytec®SPR for their waterproofing needs, further cementing its reputation for excellence.

## Celebrating 20 Years of Excellence

In 2024, Hydroseal hosted the "Taiwan Hydroseal Baytec®SPR 20-Year Sampling Witness Conference," attracting industry leaders and experts. During this event, third-party laboratories conducted thorough on-site testing and sampling, verifying that Baytec®SPR continues to deliver outstanding waterproofing performance, tensile strength, crack resistance, and concrete protection despite two decades of environmental challenges. These findings underscore Baytec®SPR's ability to exceed a lifespan of 30 years, with an anticipated durability of over 40 years.

## Innovative Application: Protecting Art and Infrastructure

Hydroseal has also pioneered the application of its waterproofing technology in art protection. In May 2024, the company unveiled the "Taiwan Hydroseal Baytec®SPR Rain Museum" in Taipei. This unique exhibition placed artworks under heavy rain for over 36 hours, demonstrating Baytec®SPR's exceptional waterproofing capabilities. The event, attended by distinguished guests and industry professionals, concluded with all artworks remaining completely unharmed,

showcasing the membrane's effectiveness even in extreme conditions.

## A Legacy of Quality and Craftsmanship

Hydroseal's chairwoman, Jennifer Tseng, expressed confidence in the company's engineering quality, stating, "Baytec®SPR can protect the most delicate artworks. We invite everyone to entrust their bridges, factories, and residential buildings' waterproofing to Taiwan Hydroseal." Co-founder and general manager Thomas Yang emphasized the brand's commitment to craftsmanship and durability, ensuring that their waterproofing solutions stand the test of time.

### About Hydroseal Enterprise Co., Ltd.

Hydroseal Enterprise Co., Ltd., based in Taipei, Taiwan, is a leading provider of innovative waterproofing solutions. With a commitment to quality and sustainability, Hydroseal develops and manufactures advanced waterproofing products designed to protect and preserve structures worldwide.
