RiskWatch International Announces New Customization Features for Its Compliance Risk Management Platform

RiskWatch, a global leader in compliance and risk management solutions, announced the addition of new reporting features to its Compliance Management Platform.

SARASOTA, FLORIDA, UNITED STATES OF AMERICA, May 30, 2024 /EINPresswire.com/ -- RiskWatch International, a leading provider of compliance and risk management solutions, has announced the addition of new reporting customization features to its compliance risk management platform. These new features will provide organizations with greater flexibility and control in managing their compliance risks. This platform is designed to automate workflows, streamline compliance tasks, and increases efficiency by an average of 80% compared to manual processes.

The new reporting customization features allow users to tailor their compliance risk reports to their specific needs and requirements. This includes the ability to select and display only the relevant data, customize the layout and design of the report, and schedule automated report generation. This will save organizations time and effort in creating and analyzing compliance risk reports, allowing them to focus on mitigating potential risks.

Riskwatch Compliance Management Software

The RiskWatch platform offers a library of over 40 pre-built frameworks and assessments aligned with standards, saving time and effort in compliance efforts. It minimizes human errors and handles large volumes of data, ensuring risk management efforts remain effective as organizations expand.

"RiskWatch is committed to providing our clients with the most comprehensive and flexible compliance risk management solutions," said Asim Chauhan, CEO of RiskWatch International. "These new features will allow our clients to tailor their compliance programs to their specific needs, improving efficiency and effectiveness."

Key Features of the RiskWatch's Compliance Management Software:

 Compliance Automation: Automate workflows, streamline compliance tasks, and assign and track tasks.

 Pre-built Content Libraries: Access a library of 40+ pre-built frameworks and assessments aligned with standards.

 Document Storage: A centralized platform for all your risk-related documents.

 Accuracy and Scalability: Minimizes human errors and handles large volumes of data.

 Collaboration: Work together with team seamlessly, share insights, and make collective decisions to manage risks effectively.

 Report Generation: Generate detailed and customized reports, providing a comprehensive view of organization's risk profile and compliance status.

RiskWatch's platform is easy to use, free to try, and can be customized to fit every business needs. It supports over 40 regulatory compliance frameworks for risk, compliance, security, and quality management.
