Same day delivery services are being deployed across numerous countries so as to ensure the timely delivery of products to the end users. Moreover, the demand for same day delivery services has increased due to the fact that the consumers are ready to spend any amount in order to get the product in a shorter time span. Also, due to this increased demand for quick availability of products, companies have entered into strategic alliances so as to ensure the timely delivery of products, which has also supplemented the growth of the global market.

Key players in the market include:

Power Link Expedite Corporation, Dropoff, Inc, Jet Delivery, Inc., XPO Logistics, Inc., FedEx Corporation, USA Couriers, Inc, DHL International GmbH, A1-SameDay Delivery Service, Inc., Aramex International Services LLC

Based on end user, the B2C segment contributed to nearly half of the total market revenue in 2019, and is anticipated to lead the trail by 2027. The same segment would also grow at the

fastest CAGR of 22.8% throughout the forecast period.

Factors such as development of the e-commerce industry and increase in trading activities due to globalization provides lucrative opportunities for the [growth of the same day delivery market](#). However, poor infrastructure & higher logistics costs and lack of control of manufacturers & retailers on logistics service are the factors that hamper the growth of the same day delivery market. Meanwhile, emergence of last mile deliveries coupled with logistics automation and cost cutting & lead time reduction due to adoption of multi-modal system are the factors that are expected to provide opportunities for the growth of the global same day delivery market in the near future.

Development of e-commerce industry and rise in trading activities due to globalization fuel the growth of the global same day delivery market. On the other hand, poor infrastructure, higher logistics costs, and lack of control of retailers on logistics service impede the growth to some extent. However, emergence of last mile deliveries coupled with logistics automation and cost cutting & lead time reduction due to adoption of multi-modal system are expected to create multiple opportunities in the industry.
