

Largest Contract for Used Solar Modules Signed with a Volume of Over 15.8 Million Units

GE4A Group (Green Energy for All) Revolutionizes the Market for Used Solar Modules and Batteries with Landmark Contract

DEN HAAG, NIEDERLANDE, June 1, 2024 /EINPresswire.com/ -- GE4A Group (Green Energy for All) proudly announces the signing of the largest contract for used solar modules, securing over 15.8 million units. This milestone highlights GE4A's commitment to pioneering reUSE technology and digital energy systems, aiming to transform the renewable energy sector globally.

Huge Volumes of PV Panels

Pioneering ReUSE Technology

Energy change is about creating a decentralized, digital, and bidirectional energy world. Urgent action now will shape a fair, transparent, and resilient energy future for all."

Toralf Nitsch, CEO of GE4A Group

GE4A revolutionizes the solar industry by refurbishing and reintroducing used solar panels into the market. This approach significantly enhances resource efficiency and reduces waste. Our advanced AI-driven sorting factories meticulously evaluate each module, determining its optimal path: direct resale or conversion into a digital version. This method extends the lifecycle of solar modules and maximizes their value.

Digital Energy Systems

The "GE4A E-Trust" system integrates blockchain technology to create digital twins of refurbished modules, ensuring comprehensive traceability and transparency. This digitalization enables new

layers of value creation, setting new standards for efficiency and trust in the energy sector by managing digital twins, CO2 certificates, and green energy alongside physical products.

Scaling Innovation with AI

GE4A is developing prototype AI-driven sorting factories to enhance the capacity to process and optimize used solar modules. These facilities will streamline operations and ensure a growing percentage of modules are transformed into digital counterparts, multiplying the generated value.

Strategic Global Expansion

The recent contract for over 15.8 million used solar modules ensures a steady supply for refurbishment, allowing GE4A to scale operations and meet growing demand. As GE4A prepares to showcase innovations at Intersolar Munich from June 19-21, new partnerships and strategies are being actively forged. These collaborations will leverage the potential of digital energy, solidifying GE4A's position at the forefront of the industry.

Why Now?

This is a pivotal moment for early investors to engage with GE4A. Advancing prototypes and demo cases present a ripe opportunity for early investment. Early investors gain access to exclusive insights and the potential to shape an industry poised for significant growth. The convergence of reUSE, AI, and digital energy systems represents a groundbreaking shift in renewable energy.

Invitation to Investors

We invite potential investors to engage in detailed discussions to explore collaboration opportunities. Your expertise and investment can play a crucial role in accelerating our growth and impact. Schedule a meeting to discuss this opportunity further at <https://ge4a.com/nc/toralf-nitsch>.

About GE4A

GE4A (Green Energy for All) is a digital renewable energy company revolutionizing the sector with innovative reUSE technology and blockchain-based digital energy systems. Led by industry veterans, GE4A focuses on sustainable and economical energy solutions, leveraging AI-driven

sorting factories and strategic partnerships. With the largest contract for over 15.8 million used modules, GE4A is poised to expand globally and lead the renewable energy revolution.
