

# Delivery Robot Market Huge Demand, High Growth Rate to Reach \$30.05 Billion by 2030, At a CAGR of 24.5%

*Increase in the number of online shopping sites and preferences for online orders are key factors causing a rise in demand for the delivery robots.*

WILMINGTON, NEW CASTLE, DELAWARE, UNITED STATES, June 3, 2024 /EINPresswire.com/ -- Factors

such as developments in the e-commerce sector and demand for contactless delivery boost the [global delivery robot market](#) across the globe. However, restricted range of delivery robots and strict regulations

concerning the operations of delivery robots create restraints for the market. On the other hand, preference for contactless delivery in the post-pandemic era would create the opportunity for delivery robots.

North America dominates the market, in terms of revenue, followed by Europe, Asia-Pacific, and LAMEA. The U.S. dominated the global [delivery robot market share](#) in North America in 2020, owing to increase in R&D activities, technological developments by big players, rapid adoption of innovative technologies in making reliable, precise, and efficient autonomous systems. North America is expected to grow at a significant rate during the forecast period, owing to rise in adoption of delivery robot, along with the presence of robot and autonomous delivery vehicle manufacturers such as Starship Technologies, Robby Technologies, Cleveron AS, and others.

By load carrying capacity, the market is categorized into up to 10 kg, more than 10 kg to 50 kg, and more than 50 kg. The more than 10 kg to 50 kg segment accounted for the highest revenue in 2020, owing to high versatility and better price to performance ratio.
