Asia Pacific is the largest market for automotive turbochargers from 2024-2030

Asia Pacific is estimated to be the largest market for automotive turbochargers owing to the largest production share of passenger cars and commercial vehicles. Asia Pacific is dominated by small cars, such as SUVs and cross-over, where the OEMs focus on engine downsizing with various turbocharger technologies. This will be a win-win situation for OEMs and consumers as they will get similar performance to naturally aspirated engines with much increase in vehicle cost. Further, the region also makes the maximum contribution to the production of commercial vehicles, and almost all heavy commercial vehicles, including heavy trucks and buses, are driven by diesel fuel and installed with turbochargers. Improving socio-economic conditions in emerging economies such as China, India, Indonesia, and Thailand along with increasing industrialization, e-commerce, and infrastructural development, the production of ICE heavy trucks and commercial vehicles are likely to continue to dominate, which will subsequently boost the turbochargers in the Asia Pacific region.
