

Phosphonates Market [2024-2031], Rapidly Growing Industry at a CAGR of 5.98%

The global phosphonates market is projected to reach \$1.6 billion by 2031, growing at a CAGR of 5.98% from 2022 to 2031.

WILMINGTON, DELAWARE, UNITED STATES, June 3, 2024

/EINPresswire.com/ -- The global [phosphonates industry](#) generated \$0.9 billion in 2021, and is projected to reach \$1.6 billion by 2031, growing at a CAGR of 5.98% from 2022 to 2031. The report provides an in-depth analysis of changing market trends, key investment pockets, top segments, regional landscape, value chain, and competitive scenario.

Allied Market Research recently published a report, titled, "Phosphonates Market by Type (ATMP, HEDP, DTPMP, BHMT, Others), by Application (Water Cleaner, Scale Inhibitors, Bleach Stabilizer, Chelating Agents, Concrete Additives, Others), by End Use (Water Treatment, Pharmaceutical, Textile, Oil and Gas, Pulp and Paper, Agriculture, Others): Global Opportunity Analysis and Industry Forecast, 2021-2031."

Drivers, restraints, and opportunities

Rise in population and rapid urbanization led to shortage of potable water in both developed and developing countries, where phosphonates are widely used. This is prime driving factor for the growth of the global phosphonates market. In addition, increase in fashion consciousness, and adoption of western culture have fueled the growth of the textile sector, which has supplemented the demand for phosphonates. However, derivatives of phosphonates such as bisphosphonates are prescribed for osteoporosis diagnosed patients and several health-related issues due to prolonged use of bisphosphonates hinder the market. On the contrary, surge in severity of diseases and growth of pharmaceutical industry across the globe have are expected to open new opportunities in the future.

Key Market Players

ACURO ORGANICS LIMITED

APCHEM

Aquapharm Chemical Pvt. Ltd.

Changzhou Kewei Fine Chemicals Co., Ltd. (KWCHEM)

Giovanni Bozzetto S.p.A.

Lanxess

Manhar Specialities

Shandong Taihe Water Treatment Technologies Co., Ltd.

TER HELL & CO. GMBH

ZSCHIMMER & SCHWARZ CHEMIE GMBH 41

The report analyzes these key players of the market. These companies have adopted several strategies such as partnerships, expansion, collaborations, new product launches, and mergers & acquisitions to maintain their foothold in the industry. In addition, the report is essential in determining the business performance, product portfolio, operating segments, and developments by every market player.

The prolonged lockdown increased the gap between supply and demand. As per a report published by the National Bureau of Statistics of China, the chemical industry experienced a 20% decline in production in March 2020 as compared to March 2019, while profits declined by 66%.

The HEDP segment dominated the market

By type, the HEDP segment held the lion's share in 2021, accounting for more than one-fourth of the global phosphonates market, and is expected to continue its leading position throughout the forecast period, due to the fact that HEDP type phosphonate acts as an excellent scale inhibitor, corrosion inhibitor, and complex chelating in various industries such as in detergents, water treatment, oilfield, and textile. However, the DTPMP segment is projected to portray the highest CAGR of 6.45% during the forecast period, due to rise in risk of waterborne disease and surged awareness about water purification application in both developed and developing countries.

The chelating agents segment to register the highest CAGR through 2031

By application, the chelating agents segment is anticipated is estimated to register the highest CAGR of 6.59% from 2022 to 2031. This is attributed to the fact that phosphonates acts as chemical additives to function as threshold antiscalants, sludge conditioners, corrosion inhibitors, and others. However, the water cleaner segment held the lion's share in 2021, contributing to more than one-fifths of the global phosphonates market. This is attributed to

rapid urbanization, rise in industrialization, increase in human-induced activities such as building & construction activity, oil spillage, and others.

The pharmaceutical segment dominated the market

By end use, the pharmaceutical segment held the largest share in 2021, accounting for more than one-fifth of the global phosphonates market, is estimated to continue its dominance throughout the forecast period. This is attributed to the fact that phosphonates have proven its pharmacological utility as inhibitors of enzymes that metabolize phosphate and pyrophosphate substrates. However, the water treatment segment is expected to showcase the highest CAGR of 6.67% from 2022 to 2031. This is attributed to increase in scarcity of potable water which in turn has surged the water treatment activities where phosphonates are used as corrosion inhibitor to prevent metal dissolution from water pipe into treated water.

Asia-Pacific held the lion's share

By region, the global phosphonates market across Asia-Pacific held the largest share in 2021, accounting for nearly two-fifths of the market. Furthermore, the market across Asia-Pacific is anticipated to register the highest CAGR of 6.15% during the forecast period, due to rapid growth of pulp & paper manufacturing sector and textile sector in developing countries such as China and India.

About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide

business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
