Exactitude Consultancy

The global abrasives market is projected to reach USD 78.55 billion by 2030 from USD 50.20 billion in 2023, at a CAGR of 5.11 % from 2024 to 2030.

Abrasives are materials used to grind away wood, concrete, ceramic, stone, or mineral. These materials provide an elegant, sleek, and finished look. The process is

often used for material polishing to gain a smooth and reflective surface. These products are used in roughening materials in matte, satin, or beaded finishes. Usage of these materials in sandpapers, grinding wheels, polishes, honing stones, tumbling and vibratory mass-finishing media, pulp stones, sandblasting, ball mills, and other tools supports the market growth. The construction industry is observing tremendous and unparalleled changes backed by economic

growth, which, in turn, is increasing the product demand.
