Outdoor LED Lighting Market is expected to reach USD 85.13 billion by 2030, growing at a CAGR of 14.7%.

The application area of LED lighting extends to warehouses, residential and commercial facilities, government buildings, and other areas. Electricity is mainly used for lighting streets and public spaces, cities, towns, and villages worldwide. A paradigm shift from traditional lighting systems to connected LED technology is the key to energy and cost effectiveness in all lighting applications. LED bulbs are well known for their energy efficiency and have the additional benefit of a long life span, which reduces maintenance and replacement costs. Smart lights can communicate wirelessly with various networks, collecting various types of data such as nearby foot traffic and even helping to reduce crime rates, which cannot be achieved using traditional lightbulbs. The LED lighting system is gaining traction from emerging countries as it forms part of their economic modernization plan.
