

Allergy Diagnostics Market Forecast: \$16.7 Billion Valuation by 2031 with a 13.2% CAGR

PORTLAND, OREGON, UNITED STATES, June 5, 2024 /EINPresswire.com/ --

Allied Market Research has recently unveiled a research study titled "[Allergy Diagnostics Market Outlook and Forecast 2021-2031](#)." This report delivers a comprehensive analysis of market risks, spotlights opportunities, and provides essential support for strategic and tactical decision-making spanning from 2021 to 2030. The study categorizes the market by pivotal regions propelling its growth and commercialization.

Moreover, the report encompasses vital insights into market research and development, growth catalysts, and the evolving investment landscape within the Allergy Diagnostics Market. It also includes profiles of key industry players, such as Thermo Fisher Scientific, PerkinElmer Inc., Danaher, Hitachi Chemicals, BIOMÉRIEUX, Omega Diagnostics Group PLC, Siemens, Eurofins Scientific, Stallergenes Greer, and Neogen Corporation.

Due to the global COVID outbreak, there was a little reduction in the market for allergy diagnostic. Given that suffering patients are well-instructed about avoiding probable environmental triggers and treating acute occurrences, also based on written action plans, diagnostic tests were postponed in the majority of allergic disorders.

However, after the pandemic was under control, the diagnostic processes were restarted. To determine the impact of COVID-19 on allergy diagnostic testing services, several research have been done.

According to a survey done in Turkey, telemedicine is preferred by allergists for treating asthma and rhinitis during the COVID-19 pandemic at a high rate. For more serious allergic conditions, such as anaphylaxis and hereditary angioedema, face-to-face interviews were recommended.

Other nations such as Italy and the U.S. also showed a similar tendency. Australia reduced the number of outpatient clinic face-to-face consultations for urgent patients with rheumatological disorders and switched approximately 80% of outpatient visits to telemedicine.

The expansion of the market was also constrained by this restriction and a decrease in different diagnostic and treatment services
