

# Malvern Dental Launches Innovative Digital Smile Design Services

*Malvern Dental introduces up-to-date digital techniques for personalized smile design, setting a new standard in dental aesthetics.*

ADELAIDE, AUSTRALIA, June 12, 2024 /EINPresswire.com/ -- [Malvern Dental and Smile Design](#), a leading provider of comprehensive dental care, is pleased to announce the launch of its new digital smile design services. This innovative approach to cosmetic dentistry leverages advanced digital technology to create personalized smile designs, aiming to enhance both the aesthetic and functional aspects of dental care and smile enhancements.

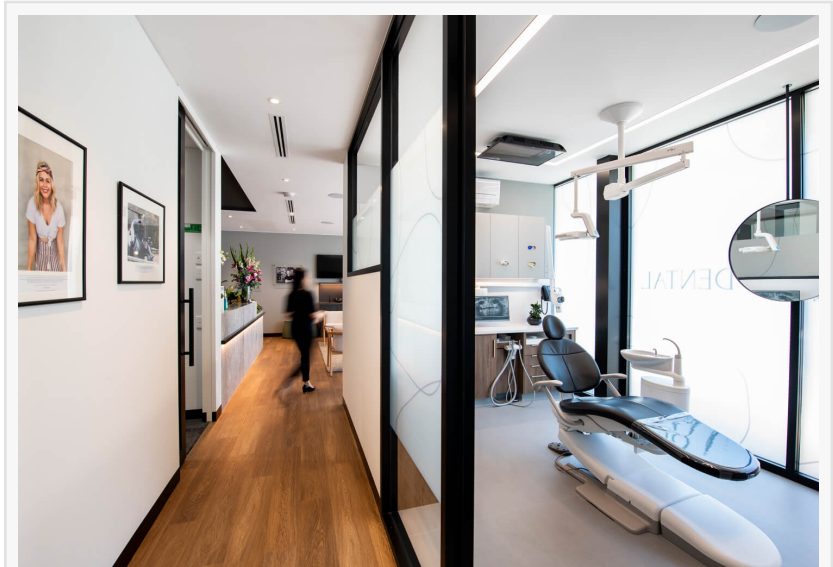

Located in the Unley area, Malvern Dental and Smile Design is dedicated to offering a wide range of dental services, including general dentistry, dental implants, orthodontic treatment, veneers, same day crowns, root canal treatment, and teeth whitening.

The introduction of digital smile design marks a significant enhancement to their suite of services, reflecting their commitment to staying at the forefront of dental technology and patient care.

Digital smile design is a modern technique that uses digital imaging and

computer-aided design to better plan and visualize dental treatments. This approach allows for precise customization of dental procedures, ensuring that each patient's unique needs and aesthetic goals are met with accuracy, control, and predictability. Patients can see a digital and physical preview of their new smile before any dental work begins, facilitating better communication between the dentist and patient.

Dr. Vadi Vojdani, the principal dentist at Malvern Dental, emphasizes the importance of personalized care in achieving the best possible outcomes for patients. "Our goal is to work closely with each patient to achieve the best oral health and the most beautiful, confident smile. The introduction of digital smile design allows us to deliver highly personalized and precise treatments that meet the individual needs of our patients," says Dr. Vojdani.

The team at Malvern Dental and Smile Design boasts extensive experience and a commitment to excellence. With over 20 years of experience, Dr. Vojdani is renowned for her attention to detail and use of advanced technologies. The hygiene department, with more than 30 years of experience, also plays a crucial role in ensuring patients receive the highest level of care.

Patient Taryn Brumfitt, 2023 Australian of the Year, film director and author, speaks highly of her experience at Malvern Dental. "Dr. Vadi created a space for me to unload all of my fears and talk through all of the emotional pain points. We put a plan in place to fix my teeth, and she assured me every step of the way. She was kind, caring, warm, and incredibly understanding," Brumfitt recalls.

In addition to the new digital smile design services, Malvern Dental offers comprehensive cosmetic and general dentistry services, including CEREC restorations, Invisalign™, and the Fresh Breath Program. The practice also provides flexible payment plan options and thorough aftercare to ensure patients receive continuous support throughout their treatment journey.
