A neurodevelopmental disease known as learning disability impairs a person's capacity for speaking, listening, reading, writing, and math. Different from intellectual development disorder, a learning disability is characterized by a child's inability to acquire academic skills appropriate for their age, intellectual capacity, experience, and education, even if they typically possess average intelligence.

Global Market for Assistive Technology for Students with Learning Disabilities

The global market for assistive technology for students with learning disabilities is expanding as a result of a rise in the prevalence of dyslexia and encouraging government attempts to increase attention to learning disorders. But learning problems are not well enough known, which is impeding the market's expansion. However, in the upcoming years, mobile applications and web portals will provide new possibilities.

Market Segments:

Holding over three-fifths of the worldwide market for assistive technology for students with learning impairments in 2020, the software segment contributed the greatest share and is likely to continue leading the market for the duration of the forecast period. Furthermore, from 2021 to 2030, this market is anticipated to show the biggest CAGR of 7.2%. This is because organizations have access to well-organized enterprise resource planning (ERP) technologies that support teachers in creating better courses and effectively running classrooms and schools. The hardware market is also examined in the study.

Regional Market:

With over 25% of the worldwide market for assistive technology for children with learning impairments in 2020, the dyslexia sector had the largest share and is expected to continue leading the market during the forecast period. This is a result of the condition's increased global prevalence within the last several years. The dysgraphia category is anticipated to experience the highest compound annual growth rate (CAGR) of 7.7% between 2021 and 2030, primarily due to the growing utilization of behavioral and occupational treatments in treatment.

Key Companies:

- Ablenet, Inc.
- Adaptivation, Inc.
- Rehabtool, LLC
- Kurzweil Education
- Enabling Devices
- Inclusive Technology
- Scanning Pens, Inc.
- Tobii Dynavox
