

# Excess Telecom: Closing the Digital Divide Beyond the Affordable Connectivity Program

*Addressing Connectivity Concerns in the Face of ACP Uncertainty*

LOS ANGELES, CA, USA, June 13, 2024 /EINPresswire.com/ -- The Affordable Connectivity Program (ACP) has been critical for millions of low-income

families, providing essential connectivity services. However, with ongoing discussions about the future of ACP funding, many families face the risk of losing access to affordable internet.

It remains likely that the ACP will return in some capacity eventually, but in the meantime, millions of households must find affordable ways to continue using this now essential service.

In response to the affordable connection challenge, the marketplace, especially Mobile Virtual Network Operators (MVNOs) like Visible, Cricket, and [Flex Mobile](#), has also stepped up. MVNOs play a crucial role in expanding affordable connectivity. Unlike larger carriers like T-Mobile, MVNOs don't own their own networks, allowing them to be more agile and cost-effective for lower-income households.

Flex Mobile was born from the expertise and trusted foundation of Excess Telecom, one of the nation's most renowned ACP and Lifeline providers. Flex Mobile continues the expansion of affordable options that The Excess Telecom family can provide. Studies have shown that affordable mobile plans significantly enhance the quality of life and economic potential, especially for lower to middle-income individuals.

Flex Mobile offers a range of affordable mobile internet plans designed for modern households. These plans provide access to high-speed data at competitive prices, ensuring everyone can connect. Flex Mobile's pay-as-you-go model allows customers to manage expenses without sacrificing connectivity. In addition, being a part of the Excess Telecom family allows customers to easily understand and enroll in benefits programs like Lifeline.

Recognizing the financial challenges faced by many low-income families, Flex Mobile also offers flexible payment options, including pay-as-you-go plans and special promotions for current Excess Telecom subscribers benefiting from Lifeline or ACP. This allows customers to manage

their internet expenses more effectively and avoid the risk of disconnection.

With the launch of the Flex Mobile brand, Excess Telecom's commitment to addressing connectivity gaps serves as a beacon of hope in the face of ACP uncertainty. By prioritizing affordability, accessibility, and community engagement, the company is paving the way for a more inclusive and connected future.

Launching exclusively for Excess Telecom subscribers on June 1st, 2024, Flex Mobile offers unlimited talk, text, and 15GB of high-speed internet. The public launch follows in July of 2024, featuring a special waitlist offer.
