

Invasive Pneumococcal Disease Market Report 2032: Epidemiology Data, Therapies, Latest Approvals by DelveInsight

Invasive Pneumococcal Disease companies are GlaxoSmithKline, Merck, Affinivax, Astellas Pharma, Vaxcyte, ImmunoBiology, EuBiologics, and others.

LAS VEGAS, NEVADA, UNITED STATES, June 9, 2024 /EINPresswire.com/ -- DelveInsight's "Invasive Pneumococcal Disease Market Insights, Epidemiology, and Market Forecast-2032" report offers an in-depth understanding of the Invasive Pneumococcal Disease, historical and forecasted epidemiology as well as the Invasive Pneumococcal Disease market trends in the United States, EU4 (Germany, Spain, Italy, France) the United Kingdom and Japan.

To Know in detail about the Invasive Pneumococcal Disease market outlook, drug uptake, treatment scenario and epidemiology trends, Click here; [Invasive Pneumococcal Disease Market Forecast](#)

Some of the key facts of the Invasive Pneumococcal Disease Market Report:

The Invasive Pneumococcal Disease market size is anticipated to grow with a significant CAGR during the study period (2019-2032).

As per DelveInsight, the Invasive Pneumococcal Disease Market is expected to expand at a healthy growth rate during the forecast period (2023-2032), owing to the launch of new therapies in the market and the rise in the number of cases.

Key Invasive Pneumococcal Disease Companies: Pfizer, Merck, Wyeth Pharmaceuticals, GlaxoSmithKline, Merck, Affinivax, Astellas Pharma, Vaxcyte, ImmunoBiology, EuBiologics, and others

Key Invasive Pneumococcal Disease Therapies: Pneumococcal 7-valent conjugate vaccine Prevnar, V114 Aluminum-adjuvanted, and others

The Invasive Pneumococcal Disease market is expected to surge due to the disease's increasing

prevalence and awareness during the forecast period. Furthermore, launching various multiple-stage Invasive Pneumococcal Disease pipeline products will significantly revolutionize the Invasive Pneumococcal Disease market dynamics.

Invasive Pneumococcal Disease Overview

According to the European Centre for Disease Prevention and Control (ECDC), pneumococcal diseases are infections caused by the bacterium *Streptococcus pneumoniae* (*S. pneumoniae*), commonly known as pneumococci. The term "Invasive Pneumococcal Disease" (IPD) refers to severe and invasive infections, such as bacteremia, sepsis, meningitis, and osteomyelitis.

Transmission occurs through respiratory droplets from individuals with pneumococcal disease or healthy carriers. When an infected person coughs or sneezes near others, the infection can spread. Once acquired, the bacterium can establish itself in the nasopharynx of the host, leading to asymptomatic colonization. It may then spread to other parts of the body and cause disease.

The major clinical syndromes of IPD are pneumonia, septicemia, and meningitis. Symptoms of pneumonia include fever, chills, coughing, rapid or difficult breathing, chest pain, rigors, tachycardia, rusty-colored sputum, a productive cough with mucopurulent sputum, dyspnea, tachypnea, hypoxia, or, in older patients, confusion or decreased alertness.

Invasive Pneumococcal Disease Epidemiology

The epidemiology section provides insights into the historical, current, and forecasted epidemiology trends in the seven major countries (7MM) from 2019 to 2032. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. The epidemiology section also provides a detailed analysis of the diagnosed patient pool and future trends.

The total number of incident cases of Invasive Pneumococcal Disease associated in 7MM countries was 55,105 in 2020.

Invasive Pneumococcal Disease Epidemiology Segmentation:

The Invasive Pneumococcal Disease market report proffers epidemiological analysis for the study period 2019–2032 in the 7MM segmented into:

Total Prevalence of Invasive Pneumococcal Disease

Prevalent Cases of Invasive Pneumococcal Disease by severity

Gender-specific Prevalence of Invasive Pneumococcal Disease

Diagnosed Cases of Episodic and Chronic Invasive Pneumococcal Disease

Invasive Pneumococcal Disease Drugs Uptake and Pipeline Development Activities

The drugs uptake section focuses on the rate of uptake of the potential drugs recently launched in the Invasive Pneumococcal Disease market or expected to get launched during the study period. The analysis covers Invasive Pneumococcal Disease market uptake by drugs, patient uptake by therapies, and sales of each drug.

Moreover, the therapeutics assessment section helps understand the drugs with the most rapid uptake and the reasons behind the maximal use of the drugs. Additionally, it compares the drugs based on market share.

The report also covers the Invasive Pneumococcal Disease Pipeline Development Activities. It provides valuable insights about different therapeutic candidates in various stages and the key companies involved in developing targeted therapeutics. It also analyzes recent developments such as collaborations, acquisitions, mergers, licensing patent details, and other information for emerging therapies.

Invasive Pneumococcal Disease Key Companies

Pfizer, Merck, Wyeth Pharmaceuticals, GlaxoSmithKline, Merck, Affinivax, Astellas Pharma, Vaxcyte, ImmunoBiology, EuBiologics

Invasive Pneumococcal Disease Therapies

Pneumococcal 7-valent conjugate vaccine Prevnar, V114 Aluminum-adjuvanted

Invasive Pneumococcal Disease Market Strengths

Treatments for Invasive Pneumococcal Disease (IPD) include antimicrobial therapy for infected patients (therapeutic), prophylactic treatment for at-risk patients, and vaccination to prevent IPD. The primary goal of symptomatic treatment is to control the spread of the bacterial infection. Current treatment involves extensive use of antibiotics, tailored based on factors such as the microorganism's susceptibility, infection severity, patient age and comorbidities, recent antibiotic use, and local resistance patterns. Major antibiotics used include penicillin, amoxicillin, cefotaxime, ceftriaxone, and erythromycin. For severe cases unresponsive to first- and second-line therapies, vancomycin is used. Often, a combination of these antibiotics is employed. Additionally, addressing the disease burden in the broader population is achieved through vaccination.

Scope of the Invasive Pneumococcal Disease Market Report:

Study Period: 2019–2032

Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan]

Key Invasive Pneumococcal Disease Companies: Pfizer, Merck, Wyeth Pharmaceuticals, GlaxoSmithKline, Merck, Affinivax, Astellas Pharma, Vaxcyte, ImmunoBiology, EuBiologics, and others

Key Invasive Pneumococcal Disease Therapies: Pneumococcal 7-valent conjugate vaccine Prevnar, V114 Aluminum-adjuvanted, and others

Invasive Pneumococcal Disease Therapeutic Assessment: Invasive Pneumococcal Disease current marketed and Invasive Pneumococcal Disease emerging therapies

Invasive Pneumococcal Disease Market Dynamics: Invasive Pneumococcal Disease market drivers and Invasive Pneumococcal Disease market barriers

Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies
