

# Gel Battery Market Projected to Reach \$2.6 Billion by 2027, Growing at a 4.2% CAGR from 2020 to 2027

WILMINGTON, DE , UNITED STATES, June 11, 2024 /EINPresswire.com/ -- The [gel battery market](#) size was valued at \$1.8 billion in 2019, and is projected to reach \$2.6 billion by 2027, growing at a CAGR of 4.2% from 2020 to 2027.

The image shows the cover of a market report titled "Global Gel Battery Market". The cover features a photograph of a grey gel battery. Text on the cover includes: "Global Gel Battery Market", "OPPORTUNITIES AND FORECAST, 2020-2027", "Global Gel Battery Market is expected to reach \$2.6 Billion by 2027.", and "Growing at a CAGR of 4.2% (2020-2027)". The Allied Market Research logo is visible in the bottom right corner of the image.

Gel Battery Market Report

The gel battery contains a predetermined amount of electrolyte, which includes sulphuric acid and silica fumes. It falls under the category of valve regulated lead acid (VRLA) batteries and finds applications in various fields like electrification, hybrid power systems, navigational aids, mobile phones, motorcycles, camcorders, marine equipment, and more.

The growth of the gel battery market is fueled by its widespread use in areas such as telecommunication, uninterrupted power supply (UPS), and other sectors. This is attributed to its advantageous features, including low maintenance, leak-proof design, high compatibility with sensitive electronic devices, cost-effectiveness per month, and others. However, challenges such as high initial costs and the need for specialized chargers and regulators are expected to impede the market's growth.

Key market players include:

Key players:

- 2V
- 6V
- 12V

00 000000000000

- Electric Mobility
- Energy Storage & Distribution
- Telecommunication
- Others

Based on the battery type, the 12V gel battery holds the largest market share, accounting for 43.8% in 2019. This dominance is driven by its widespread use in various sectors such as renewable energy, telecommunications, broadband, and others. Its popularity in these areas is due to its advantageous features such as prolonged retention time, extended service life, ease of handling, no need for distilled water addition, among others.

Regarding applications, the energy storage & distribution segment is poised for rapid growth, expected to achieve a CAGR of 4.6%. This growth is fueled by increasing demand from the energy sector in developing regions. Gel battery adoption for energy storage & distribution in Asia-Pacific and LAMEA regions is projected to grow at CAGRs of 4.7% and 6.3%, respectively, from 2020 to 2027.

In terms of regions, Asia-Pacific commands the largest market share, capturing 39.9% in 2019. This dominance is attributed to the region's substantial consumer base, presence of key manufacturing players—particularly in countries like China—and the burgeoning telecommunication and energy sectors, which collectively bolster the gel battery market's growth.

000 0000000000 00 000 000000:

- The gel battery market is analyzed from 2019 to 2027
- Depending on the type, the 12V battery segment is projected to grow at a CAGR of nearly 4.3%, in terms of revenue, during the forecast period
- Region wise, North America is expected to register a CAGR of nearly 3.4%, in terms of revenue, in the coming future
- By application, the energy & distribution segment is estimated to exhibit a CAGR of 4.6%, in terms of revenue
- Asia-Pacific dominated the gel battery market with a share of over 39.9% in 2019, in terms of revenue
- A comprehensive analysis of the factors that drive and restrain the market growth is provided in the report

• The qualitative data in this report aims at the market dynamics, gel battery market trends, and developments in the industry
