Professional cloud services refer to companies that provide expert assistance to aid businesses in designing, implementing, and managing cloud systems.

The main types of professional cloud services are consulting, application development and modernization, implementation and migration, integration, and optimization. Consulting refers to the business giving expert advice or support about a particular profession or technology. The organizations, including small and medium-sized enterprises (SMEs) and large enterprises, install services such as platform as a service (PaaS), software as a service (SaaS), and infrastructure as a service (IaaS) used to deploy high-end cloud solutions in three major models: public, private, and hybrid. These services are used by various end-user industries, such as manufacturing, healthcare, retail, IT and telecommunications, government, media and entertainment, BFSI, and other end-user industries.
