Proteases refer to a large and various group of enzymes that break down protein. Proteases break down proteins in the body or skin to help with digestion or with the breakdown of proteins causing swelling and pain.

The main sources of proteases are animal, plant, and microbial. Animal proteases refer to enzymes that are originated from animals. Pancreatic trypsin, chymotrypsin, pepsin, and renin are some of the animal proteases. These are available in liquid and powder form that are used in applications such as food and beverage, healthcare, animal feed, and others.
