

Lyzr Introduces Skott: The Future of Autonomous Al Agents in Organizations

JERSEY CITY, NEW JERSEY, UNITED STATES, June 18, 2024 /EINPresswire.com/ -- Lyzr, a leading provider of AI solutions, is proud to introduce <u>Skott</u>, a fully autonomous AI agent that is revolutionizing the way organizations operate. This is Lyzr's second autonomous role agent after their initial successful launch of Jazon -The AI Sales Development Agent, shortly called as the AI SDR.

Skott represents the future of agentled workforce, offering unparalleled efficiency and productivity.

Skott - The Fully Autonomous AI Content Marketer from Lyzr

Skott's unparalleled research capabilities powered by Perplexity's, Google and Lyzr's own webcrawler technology enable Skott to generate high-quality and engaging content for readers. This

٢

Skott provides the equivalent output of 9 fulltime human content creators. This results in substantial cost savings of over \$500,000 per year for organizations." is where Skott stands out from rest of the SaaS competitors like Jasper, Hypotenuse, Copy AI, etc. Add to it the fact that Skott runs locally on the customer's cloud server, which ensures 100% data privacy and compliance for customers.

One of Skott's unique features is a technology called AgentMesh by Lyzr. This allows Skott and similar AI agents to quickly share information and learn from each other. This groundbreaking technology enables the agents to exchange data and tap into collective intelligence for enhanced decision-making capabilities.

Team Lyzr

Additionally, Lyzr's HumanLike API further enhances Skott's output by reviewing and rephrasing its own content to remove any AI influence. This ensures that Skott's output is more human-like and resonates better with the intended audience.

Skott's effectiveness in organizations is backed by impressive metrics. With the ability to write up to 72 high-quality, well-researched blog posts and close to 6500 social media posts in a day, Skott provides the equivalent output of 9 full-time human content creators. This results in substantial cost savings of over \$500,000 per year for organizations.

The rise of autonomous AI agents like Skott is driven by various market trends and industry factors. The capabilities of large language models, such as GPT-40 and Claude3 Opus, provide the necessary reasoning power for agents like Skott and Jazon. This empowers the agents to focus on execution, reflection, and inter-task communication, leading to increased efficiency and productivity in organizations.

Early customers of Skott have reported a remarkable 430% increase in their SEO performance within the first 90 days. This highlights the significant impact that autonomous AI agents can have on organizations, driving tangible results and improving overall performance.

"Fully autonomous AI agents like Skott from Lyzr is the future of agent-led workforce in organizations. Lyzr's AgentMesh allows the AI agents like Skott and Jazon communicate and learn from one another, all in a matter of seconds," stated Siva Surendira, Founder & Chief Architect at Lyzr. This quote encapsulates the transformative power of Skott and the cutting-edge technology behind it.

Lyzr ensures the utmost security and privacy of data when using autonomous AI agents like Skott. Unlike SaaS platforms where customers have to upload and generate content on their platform, Skott runs locally on the customer's cloud server. This approach guarantees 100% data privacy and compliance, giving organizations peace of mind. In conclusion, Lyzr's introduction of Skott marks a significant milestone in the realm of autonomous AI agents. With its groundbreaking features, including AgentMesh technology and the HumanLike API, Skott is poised to revolutionize the way organizations operate.

The future of agent-led workforce has arrived, and it is powered by Skott.
