

# Stuttering Market is Predicted to Exhibit Remarkable Growth From the Forecast Period (2024-2034), Analyzes DelveInsight

*DelveInsight's Stuttering Market report offers an in-depth understanding of the epidemiology and market trends in the 7MM.*

NEVADA, LAS VEGAS, UNITED STATES, June 14, 2024 /EINPresswire.com/ -- DelveInsight's "Stuttering Market Insights, Epidemiology, and Market Forecast-2034" report offers an in-depth understanding of the Stuttering, historical and forecasted epidemiology as well as the Stuttering market trends in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan.

The Stuttering market report covers emerging drugs, current treatment practices, market share of the individual therapies, and current & forecasted market size from 2020 to 2034. It also evaluates the current treatment practice/algorithm, market drivers & barriers, and unmet medical needs to curate the best of the opportunities and assess the underlying potential of the market.

Some of the key facts of the Stuttering Market Report:

The Stuttering market size was valued approximately USD 40 Million in the year 2023 and is anticipated to grow with a significant CAGR during the study period (2020-2034)

In 2023, the EU4 countries and the UK collectively generated approximately USD 3.9 million, with expectations of significant compound annual growth. Within Europe, Germany and France held the largest market shares, followed by the UK and Italy, while Spain had the smallest market share for that year.

DelveInsight estimates that there were approximately 4,013,792 total prevalent cases of stuttering in the 7MM, with around 885,952 diagnosed prevalent cases in 2023. These numbers

are expected to rise by 2034 due to better understanding of the condition and heightened awareness among healthcare professionals and the general public.

The total diagnosed prevalent cases of stuttering in the US were approximately 415,969,023. This number is expected to rise by 2034.

In 2023, the US accounted for about 47% of the total diagnosed prevalent cases of stuttering among the 7MM, with the EU4 and the UK making up nearly 38%, and Japan around 15%. These cases are expected to rise by 2034 due to improved diagnostic methods, resulting in more accurate identification and reporting globally.

According to DelveInsight's analysis, in 2023, there was a gender-specific distribution of the disease showing male predominance, with approximately 664,464 cases, compared to around 221,488 cases in females among the total diagnosed prevalent cases in the 7MM. These numbers are expected to rise during the forecast period due to societal and cultural influences on reporting and diagnosis, possibly because males face less stigma or societal pressure to hide their speech difficulties compared to females.

Key Stuttering Companies: Emalex Biosciences, and others

Key Stuttering Therapies: Ecopipam (EBS-101), and others

The Stuttering epidemiology based on gender analyzed that males have higher prevalence rate than females with a ratio of 3:1

## Stuttering Overview

Stuttering, also known as stammering, is a speech disorder characterized by disruptions in the flow of speech. These disruptions can include repetitions of sounds, syllables, or words, prolongations of sounds, and involuntary pauses or blocks where the person is unable to produce sounds. Stuttering can affect communication and may lead to social and emotional challenges.

## Stuttering Market

The dynamics of the Stuttering market are anticipated to change in the coming years owing to the expected launch of emerging therapies and others during the forecasted period 2020-2034.

“In conditions such as Stuttering, close collaboration among all stakeholders is important because collaborative studies and systematic data collection will help further in the understanding of disease pathophysiology. As a next step, a global prospective study will help all the research fraternity in better understanding of biomarkers and diagnostic tests which will be relevant for future therapeutic clinical trials.”

## Stuttering Epidemiology

The epidemiology section provides insights into the historical, current, and forecasted epidemiology trends in the seven major countries (7MM) from 2020 to 2034. It helps to recognize

the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. The epidemiology section also provides a detailed analysis of the diagnosed patient pool and future trends.

#### Stuttering Epidemiology Segmentation:

The Stuttering market report proffers epidemiological analysis for the study period 2020–2034 in the 7MM segmented into:

Total Prevalence of Stuttering

Prevalent Cases of Stuttering by severity

Gender-specific Prevalence of Stuttering

Diagnosed Cases of Episodic and Chronic Stuttering

#### Stuttering Drugs Uptake and Pipeline Development Activities

The drugs uptake section focuses on the rate of uptake of the potential drugs recently launched in the Stuttering market or expected to get launched during the study period. The analysis covers Stuttering market uptake by drugs, patient uptake by therapies, and sales of each drug. Moreover, the therapeutics assessment section helps understand the drugs with the most rapid uptake and the reasons behind the maximal use of the drugs. Additionally, it compares the drugs based on market share.

The report also covers the Stuttering Pipeline Development Activities. It provides valuable insights about different therapeutic candidates in various stages and the key companies involved in developing targeted therapeutics. It also analyzes recent developments such as collaborations, acquisitions, mergers, licensing patent details, and other information for emerging therapies.

#### Stuttering Therapies and Key Companies

Ecopipam (EBS-101): Emalex Biosciences

#### Stuttering Market Drivers

Increasing prevalence

No approved drug (huge opportunity in the market)

Genetic findings

Increasing awareness in parents

#### Stuttering Market Barriers

Underdiagnoses

Treatment guidelines and recommendations are focused on non-pharmacologic therapy

Challenges in the management of the disease

Insufficient knowledge of the pathogenesis

#### Scope of the Stuttering Market Report

Study Period: 2020–2034

Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan]

Key Stuttering Companies: Emalex Biosciences, and others

Key Stuttering Therapies: Ecopipam (EBS-101), and others

Stuttering Therapeutic Assessment: Stuttering current marketed and Stuttering emerging therapies

Stuttering Market Dynamics: Stuttering market drivers and Stuttering market barriers

Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies

Stuttering Unmet Needs, KOL's views, Analyst's views, Stuttering Market Access and Reimbursement
