Key Takeaways from the Ulcerated Necrobiosis Lipoidica Market Report

- DelveInsight's analyst estimate that approximately 256 thousand Diagnosed Prevalent Cases of Necrobiosis Lipoidica were found in 2023 in the 7MM. The Total Diagnosed Prevalent Cases of Ulcerated Necrobiosis Lipoidica (uNL) in the 7MM were 88 thousand in 2023.
- The United States exhibited the highest diagnosed prevalent population of Ulcerated Necrobiosis Lipoidica (uNL), as compared to other 7MM countries. As per DelveInsight's estimations, the Total Diagnosed Prevalent Cases of Ulcerated Necrobiosis Lipoidica (uNL) in the US was around 50 thousand in 2023 and is projected to increase during the forecast period. The projected rise in cases is attributed to the growing diagnosed prevalence, which is a result of the absence of established treatment protocols for this illness and its inadequate management.
- According to DelveInsight's estimates, the Total Diagnosed Prevalent Cases of Ulcerated Necrobiosis Lipoidica (uNL) in EU4 and the UK were found to be ~28 thousand in 2023.

Throughout the study period, it is anticipated that there will be a substantial increase in cases for all contributing countries, except for Germany and Italy, where the cases are expected to decrease by 2034. The highest proportion of Ulcerated Necrobiosis Lipoidica (uNL) cases was reported in Germany among the EU4 countries, while the least number of cases was found in France.

- The estimates show the Total Diagnosed Prevalent Cases of Ulcerated Necrobiosis Lipoidica (uNL) in Japan was found to be around 9 thousand in 2023, which is estimated to decrease by 2034.
- The Gender-specific Cases of Ulcerated Necrobiosis Lipoidica (uNL) in the 7MM were ~200 thousand for females and ~55 thousand for males in 2023 and are expected to increase within the forecast period (2024–2034).
- The leading Ulcerated Necrobiosis Lipoidica Companies such as Astellas Pharma, Vibcare Pharma, Pfizer Inc., Manus Aktteva Biopharma LLP, Mylan Pharmaceuticals Inc., Upsher-Smith Laboratories, Novartis AG, Sanofi S.A, Merck & Co. Inc., GSK Plc., Johnson & Johnson, Pfizer Inc., Novartis AG, Sanofi S.A., GlaxoSmithKline plc, Merck & Co., Inc., Roche Holding AG, AstraZeneca plc, AbbVie Inc., Eli Lilly and Company, Bristol Myers Squibb, Boehringer Ingelheim International GmbH, Takeda Pharmaceutical Company Limited, Amgen Inc., Celgene Corporation, Gilead Sciences, Inc., Biogen Inc., Astellas Pharma Inc., Daiichi Sankyo Company, Limited, Eisai Co., Ltd., and others.

Ulcerated Necrobiosis Lipoidica Treatment Market

Ulcerated Necrobiosis Lipoidica treatment of ulcerations in patients with NL is challenging, and relapses occur frequently. No known standardized effective treatment for UNL is available until today. There are several treatment options described in the literature that are not evidence-based. The main reason is the low number of cases, especially of UNL, and the remarkable number of side effects of most therapies that a lot of patients are not willing to tolerate, considering that – in many cases – just the nonulcerated patches do not cause strain.

Recorded treatment options are intralesional and topical steroids or tacrolimus, topical PUVA or UVA1, systemic steroids, doxycycline, antimalarial drugs, and fumaric acid esters (FAEs), pentoxifylline, cyclosporine A, biological agents and surgery with excision followed by skin grafting.

Unlock insights into the Ulcerated Necrobiosis Lipoidica Market: discover drug uptake patterns, treatment landscapes, and epidemiological insights with our exclusive Ulcerated Necrobiosis Lipoidica Market Forecast.
