### Rising Prevalence of Chronic Kidney Disease Drives Market Growth

The increasing prevalence of chronic kidney disease (CKD) is a key driver for the nephrology drugs market. CKD refers to the gradual loss of kidney function over time, leading to the accumulation of waste products in the body.

Nephrology drugs play a crucial role in managing CKD, enhancing kidney function, and slowing disease progression. According to the Centers for Disease Control and Prevention (CDC), over 37 million people in the US

were diagnosed with CKD, with a higher prevalence among individuals aged 65 years and older. Similarly, in Canada, 4 million people suffer from kidney diseases, with diabetes being a leading cause of kidney failure. These statistics underscore the growing demand for nephrology drugs worldwide.
