Rise in Prevalence of Arthritis Drives Market Growth

The rise in arthritis prevalence is expected to be a significant driver for the pedicle screw systems market. Arthritis, a common joint disorder, necessitates accurate and safe surgical interventions like cervical pedicle screw insertion, especially for patients with conditions such as

rheumatoid arthritis (RA). According to the Centers for Disease Control and Prevention, arthritis cases are projected to increase to 78.4 million adults by 2040, underscoring the critical role of pedicle screw systems in managing spinal conditions associated with arthritis.
