## Increasing AI Adoption Fuels Market Growth

The growing adoption of AI technology significantly propels the AI-based clinical trial solution provider market. AI technology is increasingly utilized by clinical trial solution providers to enhance the efficiency, accuracy, and innovation of various stages of the clinical trial lifecycle, ultimately improving patient outcomes and advancing medical research. For example, in May 2022, IBM reported a significant increase in the global AI adoption rate, with 35% of organizations incorporating AI into their operations. This trend highlights the pivotal role of AI in driving market growth.
