As per the report, the industry is projected to garner \$11,061.0 million with a growing CAGR of 7.7% by 2028. The market generated \$6,066.1 million in 2020. The study highlights the factors driving, restraining, and providing opportunities in the industry. It assists businesses in understanding the forces that influence consumer purchasing decisions and contributes to market growth.

The global HVAC filters industry is gaining popularity due to strict government policies for maintaining IAQ (Indoor Air Quality) in industrial spaces and degradation of air quality. However, frequent replacement and cleaning requirements hamper the industry's growth to some extent. Nevertheless, the rise in awareness toward maintaining hygiene will open new avenues for the market in the upcoming era.

Futuristic trends in the industry

Smart filters: Smart technologies are transforming the HVAC industry, including air filtration. Smart air filters, equipped with sensors and IoT connectivity, can monitor air quality in real time and adjust filtration levels as needed. These filters also offer insights into air quality metrics like particulate matter levels and VOC concentrations, allowing users to take proactive steps to enhance indoor air quality.

Modular designs: As the HVAC filters market evolves and becomes complex and diverse, there is a growing demand for personalized air filtration solutions. Manufacturers are offering modular filter designs that facilitate easy customization according to specific air quality requirements and HVAC system setups. These modular filters allow users to adapt their filtration systems to their unique needs, ensuring optimal performance and efficiency.

### Competitive scenario

The report also examines the competitive landscape of the market. It provides details on the strengths, product portfolios, market size and share analysis, business performance, and market positioning of the key industry players. Additionally, it covers the strategic actions taken by these players to grow and expand their presence, such as entering into agreements and exploring new business sectors. Other strategies discussed include mergers and acquisitions, joint ventures, and product launches. The top players analyzed in the report are:

Camfil AB

3M Company

Mann+Hummel

Parker-Hannifin Corporation

Ahlstrom-Munksjö

American Air Filter Company, Inc.

Filtration Group Corporation

Donaldson Company, Inc.

Freudenberg Group

Sogefi Group
