#### Definition:

G-Seats are special seats that are used in aircraft to protect passengers from the negative effects of high g-forces. These forces can cause a range of health problems, including blackouts, vomiting, and even death. G-Seats help to prevent these problems by limiting the amount of g-force that a passenger is exposed to. There are two main types of G-Seat: fighter G-Seats and helicopter G-Seats. Innovation and new technologies in seating materials, design, and functionality can drive demand for more advanced and comfortable seating products. Embracing and integrating new technologies into seating products, such as smart features, IoT connectivity, or enhanced comfort and ergonomics, can attract tech-savvy consumers.
