Increasing Prevalence of Diabetes Drives Market Growth

The rising prevalence of diabetes is a significant factor contributing to the growth of the diabetic gastroparesis treatment market. Diabetic gastroparesis is a common complication of diabetes, necessitating effective management of its symptoms and complications. According to a 2023 report by The British Diabetic Association, 4.3 million individuals in the UK are diagnosed with diabetes, with over 2.4 million at high risk of developing type 2 diabetes. This increasing diabetic population underscores the need for enhanced treatment options for diabetic gastroparesis.

Key Players and Market Trends

Major companies in the diabetic gastroparesis treatment market include Cardinal Health Inc., Pfizer Inc., F. Hoffmann-La Roche Ltd., and more. These companies focus on developing new products to maintain their market positions. In June 2023, the U.S. Food and Drug Administration approved two medications, Empagliflozin (Jardiance) and Synjardy (Empagliflozin and Metformin Hydrochloride), for use in children aged ten and older, previously used for adults with type 2 diabetes. This approval highlights the trend towards new medication development to enhance glycemic control.
