

Sharps Containers Market Updates 2024 : Size, Key Drivers, and Opportunities 2021-2031

The sharps containers market size is estimated to reach \$632.8 million by 2031, growing at a CAGR of 3.9% from 2022 to 2031.

WILMINGTON, DELAWARE , UNITED STATES, June 18, 2024

/EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Sharps Containers Market](#)," the [sharps containers](#) market size was valued at \$430.75 million in 2021, and is estimated to reach \$632.8 million by 2031, growing at a CAGR of 3.9% from 2022 to 2031.

A sharp container is a hard plastic container used to dispose scalpels, IV catheters, and other sharp medical devices in a safe manner. Medical wastes such as needles, syringes, damaged glass, blood samples, and infectious pathogens are disposed by using sharps containers. These containers are made of plastics to reduce the risk of contamination and prevent the spreading of diseases.

“

The sharps containers market size is driven by rise in demand for catheters, saline needles, syringes, and reagents ”

Allied Market Research

Based on usage, the reusable containers segment contributed to the largest share in 2021, accounting for nearly two-thirds of the global market, and is expected to maintain its dominance by 2031. Moreover, this segment is

projected to grow at the highest CAGR of 4.4% during the forecast period. The research also discusses the single-use containers segment.
