

Surgical Retractor Market Updates 2024 : North American Region is Expected to Dominate During 2019–2026.

The surgical retractor market was valued at \$2 billion in 2018, and is expected to reach \$3 billion by 2026, registering a CAGR of 3.9% from 2019 to 2026.

WILMINGTON, DELAWARE , UNITED STATES, June 19, 2024

/EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Surgical Retractor Market](#) by Product Type, Application: Global Opportunity Analysis and Industry Forecast, 2019–2026," the [surgical retractor](#) market was valued at \$2 billion in 2018, and is expected to reach \$3 billion by 2026, registering a CAGR of 3.9% from 2019 to 2026.

Surgical Retractor Market

Most surgical procedures involve making incisions in the patient's skin to access internal organs.

“

The surgical retractor market accounted for \$2,689 million in 2018, and is expected to reach \$3,656 million by 2026, registering a CAGR of 3.9% from 2019 to 2026.”

Allied Market Research

These incisions are typically small and narrow, necessitating the use of surgical retractors to keep them open during the procedure. A surgical retractor is a medical instrument designed to hold the surgical incision open, allowing the surgeon to operate with a clear view of the site or organ being treated. These instruments function by keeping tissues or organs out of the way. The market offers various types of retractors, including hand retractors, self-retaining retractors, and wire retractors. A self-retaining retractor enables hands-free operation during surgery, while a hand retractor is manually held by

the surgeon throughout the procedure.

The surgical retractor market is analyzed based on product type, application, and region to provide a comprehensive market assessment. By product type, the market is segmented into hand retractors, self-retaining retractors, table-mounted retractors, wire retractors, and accessories. Depending on application, it is divided into abdominal surgeries, cardiothoracic surgeries, orthopedic surgeries, obstetric and gynecological surgeries, and others. Regionally, it is examined across North America (the U.S., Canada, and Mexico), Europe (Germany, France, the UK, Italy, and the rest of Europe), Asia-Pacific (China, Japan, India, and the rest of Asia-Pacific), and LAMEA (Brazil, South Africa, and the rest of LAMEA).

In terms of product type, hand retractors held the largest market share due to their increased adoption in plastic surgeries and small bone and joint surgeries. The growing number of plastic surgeries worldwide significantly boosts the growth of this segment. However, the self-retaining retractors segment is anticipated to experience the fastest growth rate during the forecast period. This is attributed to the device's locking system, which allows surgeons to use both hands, making surgeries more convenient. Additionally, increased awareness of self-retaining retractors and rising healthcare expenditures further drive market growth.

By application, the abdominal surgeries segment captured the largest market share due to the high number of abdominal surgeries performed globally. These surgeries often require large incisions to provide a better view of the organs, increasing the demand for surgical retractors. Conversely, the cardiothoracic surgeries segment is expected to register the fastest growth rate during the forecast period, driven by the rising prevalence of cardiac disorders worldwide.

Key highlights of the report:

This report entails a detailed quantitative analysis along with the current global surgical retractor market trends from 2018 to 2026 to identify the prevailing opportunities along with the strategic assessment.

The surgical retractor market forecast is studied from 2019 to 2026.

The market size and estimations are based on a comprehensive analysis of key developments in the surgical retractor industry.

A qualitative analysis based on innovative products facilitates strategic business planning.

The development strategies adopted by the key market players are enlisted to understand the competitive scenario of the surgical retractor market.

Key players:

B. Braun Melsungen AG

Baxter International Inc.

Dickinson and Company

Becton, Henke-Sass Wolf
Henry Schein, Inc.
Novo Nordisk A/S
Integra Lifesciences Holdings Corporation
Medline Industries, Inc.
Johnson & Johnson
Teleflex Incorporated
Medtronic Plc.
The Cooper Companies, Inc.
Terumo Corporation.
