

Skillable and Layer8 Training launch self-paced Citrix labs for global hands-on training

The Citrix self-paced online labs perfectly complement Pluralsight Citrix content with hands-on practice in non-production environments.

NEW PORT RICHEY, FLORIDA, UNITED STATES, June 20, 2024

/EINPresswire.com/ -- [Skillable](#), the pioneer in hands-on labs that build and validate skills, and IT training organization Layer8 Training have launched Citrix self-paced online labs that complement the knowledge-based

Citrix learning content offered by Pluralsight. The self-paced online labs provide a safe, non-production environment for individuals to practice their Citrix theory in activities that mimic real-world tasks and responsibilities. This ensures knowledge is correctly applied on the job, reducing the risk of incorrect configuration or task failure and instilling confidence in a learner's new Citrix skills.

“

The self-paced Citrix labs bring hands-on learning to individuals, at a competitive price point, to provide a full feature learning experience that complements Pluralsight learning content.”

Todd Hurst, CEO of Layer8 Training

Citrix self-paced online labs

The self-paced Citrix labs are available to purchase at a dedicated online [store](#), with prices starting from \$60 USD per person. Options include:

1. Citrix Administrator Academy: These labs are designed for Citrix administrators and serve as an introduction to Citrix Virtual Apps and Desktops and Citrix DaaS.
2. NetScaler Administrator Academy: These labs are designed for new NetScaler administrators and serve as an

introduction to NetScaler Administration and Gateway.

Each lab module comes with integrated step-by-step instructions that enable individuals to

correctly complete a task within the non-production Citrix environment. Real-time feedback helps learners understand what they've completed well and areas of improvement. Lab assessments provide validation that an individual is ready to work on Citrix Virtual Apps, desktop and DaaS in the real world. Hosted in localized datacenters and available on-demand, the labs make Citrix hands-on learning globally accessible.

Todd Hurst, CEO of Layer8 Training, said, "The self-paced Citrix labs bring hands-on learning to individuals, at a competitive price point, to provide a full feature learning experience that complements Pluralsight learning content. After watching a video and completing a knowledge-based course, it makes sense to practice your learning first in a safe environment that doesn't risk business continuity or operations. That's exactly what the Citrix labs offer, with tasks that mimic real-world business challenges, so learners are fully prepared for using Citrix on the job."

Mark Mangelson, Chief Revenue Officer at Skillable, said, "When preparing for a business-critical role using tools like Citrix, you need to be fully confident that you can apply skills in the moment of need, under pressure. The hands-on Citrix lab environments provided via Layer8 Training offer the practice and challenges needed to move learners into true skill mastery and confidence so they are prepared for whatever task or problem comes their way."

The Citrix and other lab libraries will continue to grow as Layer8 Training and Skillable create more content supporting the Pluralsight catalog.
