

Optimize Work-Life balance with Voiset: AI-powered task planner enhancements

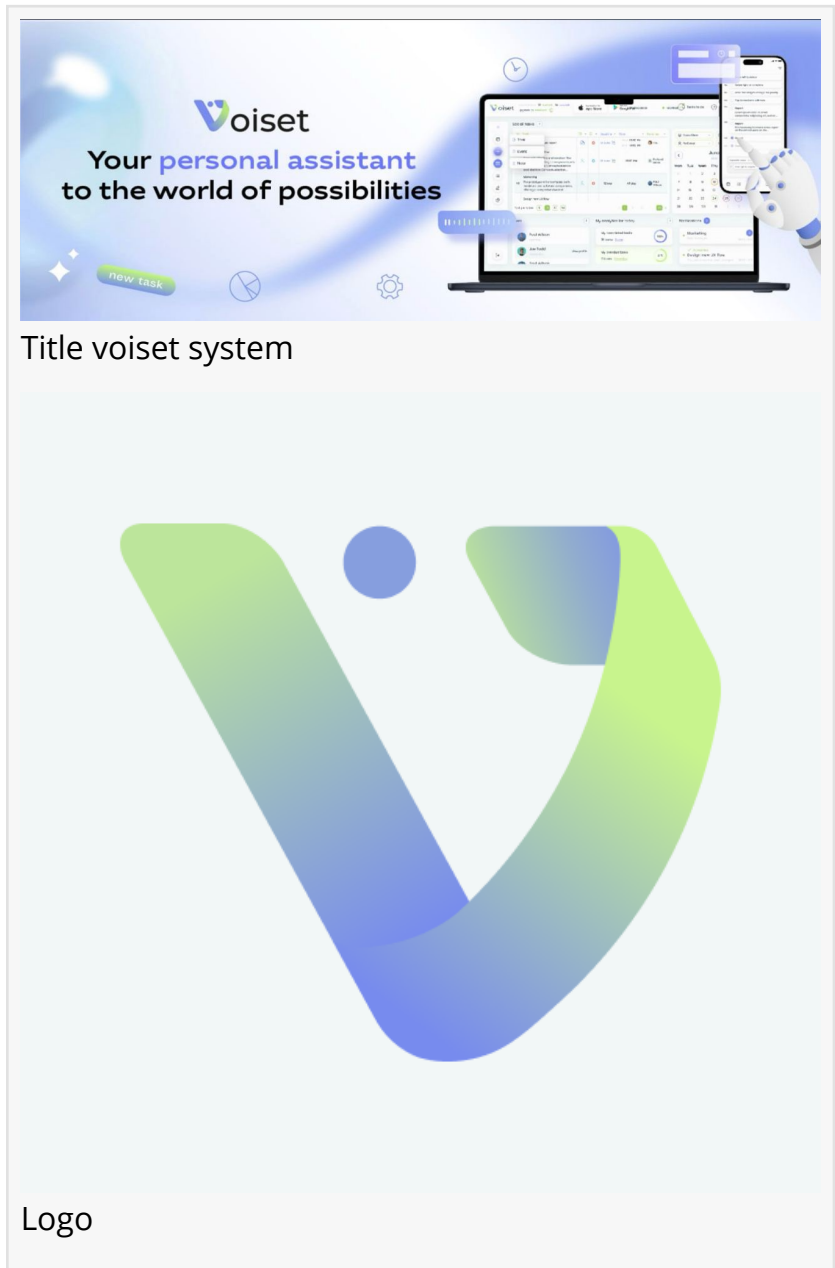

Enhance productivity and achieve work-life balance with Voiset's latest AI-powered features, including voice input and advanced task management capabilities.

BRATISLAVA, SLOVAKIA, June 19, 2024 /EINPresswire.com/ -- Union Smart Technology is excited to announce significant upgrades to [Voiset](#), our AI-based task planner, designed to enhance work-life balance. Voiset now includes powerful new features that make managing your tasks and time more efficient and effortless.

One of the standout additions is the [voice input](#) feature. Users can now create notes on the go using voice input. The AI within Voiset processes and analyzes these notes, seamlessly incorporating them into your schedule while considering your daily workload. This eliminates the need to manually create and sort through text notes, [saving valuable time](#).

Voiset also introduces advanced task management capabilities. Users can create dedicated project areas, add team members, and track the progress of each task. This feature is particularly useful for teams working on collaborative projects, as it ensures everyone stays on track and deadlines are met.

Our AI acts as a personal manager, providing reminders for your ideas, plans, and goals. It helps

prevent task overload by intelligently scheduling your tasks and ensuring you have a balanced workload. This smart solution is perfect for maintaining a healthy balance between your personal life and work responsibilities.

The upgrades also include a more intuitive user interface, making it easier than ever to navigate and use all the features Voiset offers. We aim to make Voiset the ultimate tool for productivity and work-life balance.

Discover the new features of Voiset by visiting our website or downloading the app today. For more information, visit voiset.io.
