Key Takeaways:

By application, the examination segment was the largest contributor to the market in 2022. By end user, the dental clinics segment dominated the market in 2022. However, the other segment is anticipated to grow at the highest CAGR during the forecast period. Region wise, North America generated the largest revenue in 2022. However, Asia-Pacific is anticipated to grow at the highest CAGR during the forecast period.

Factors Driving Growth: The market growth is primarily fueled by the increasing prevalence of dental infections such as dental caries and periodontal diseases, along with the growing adoption of portable dental chairs. Advancements in portable dental chair design are also contributing to market expansion. However, a shortage of dental specialists may hinder growth,

though emerging markets offer new opportunities.

Impact of Economic Downturn: Recessionary periods may lead to reduced healthcare spending, potentially affecting the demand for portable dental chairs. However, the mobile industry and the number of dental surgeries may experience moderate positive impacts during such periods.

Economic Downturn Analysis:

During a recession, individuals and governments might tighten their budgets, leading to reduced healthcare spending. This could affect patients' ability to access and afford portable dental chair products, potentially leading to decreased demand for these products. In addition, dental professionals may delay or cancel capital expenditures, including the purchase of new portable dental chairs, during a recession.

However, the rise in demand for the mobile industry and rise in number of dental surgeries are experiencing a moderate positive impact from the global recession.
