Rising Infectious Diseases Fueling Growth In The Anthrax Vaccine Market

The rising prevalence of infectious diseases is expected to propel the growth of the anthrax vaccine market going forward. Infectious diseases, caused by pathogenic microorganisms such as bacteria, viruses, parasites, or fungi, can spread directly or indirectly from one person to another. The prevalence of these diseases is increasing

due to demographic shifts, urbanization, environmental changes, and changes in human behavior. The anthrax vaccine is primarily utilized to protect against anthrax, and research is exploring its potential for broader use in preventing other infectious diseases.
