Smoking Cessation Treatment Market

Numerous effective methods support tobacco cessation, encompassing behavioral therapies and medications. Presently, there is a diverse range of 89 distinct products and services tailored for smoking cessation. Additionally, there are 12 smoking alternatives available, although they are not explicitly designed for cessation. FDA-approved pharmacotherapies consist of various forms of nicotine replacement therapy (NRT) such as transdermal patches, gum, nasal spray, oral inhalers, and lozenges.

Smoking Cessation Drug Market

• Varenicline (Champix) and bupropion-SR (Zyban) have received approval for smoking cessation. Cytisine, available as a generic agent under the brands Tabex by Sopharma and Desmoxan by Aflofarm Pharma, has been utilized for smoking cessation, both with and without a prescription, primarily in Eastern Europe since the 1960s. In Japan, smoking cessation methods include varenicline (Champix), nicotine replacement therapy (NRT), and some off-label therapies. Notably, bupropion-SR is not authorized in Japan for smoking cessation.
