## Impact Of Coronary Heart Disease On Drug-Eluting Stent Market

The rising burden of coronary heart disease (CHD) is expected to propel the growth of the drug eluting stent market. CHD occurs when the coronary arteries become narrowed or blocked due to plaque buildup, potentially leading to severe complications such as heart attacks or chest pain. Factors such as sedentary lifestyles, poor diets, aging populations, and heightened awareness are contributing to the increase in coronary heart disease. Drug-eluting stents (DES) effectively open narrowed or blocked coronary arteries and release medication that helps
