Investing in Regulation CF offerings involves a high degree of risk. Securities sold through Regulation CF Offerings are typically not publicly traded and, therefore, are less liquid. Additionally, investors will receive restricted stock that is subject to holding period requirements. Companies seeking capital through Regulation CF Offerings tend to be in earlier stages of development and have not yet been fully tested in the public marketplace. Investing in Regulation CF Offerings requires a tolerance for high risk, low liquidity, and a long-term commitment. Investors must be able to afford to lose their entire investment. Such investment products are not FDIC insured, may lose value, and have no bank guarantee.
