

All Things Off Grid Unveils Groundbreaking DIY ESS Battery Kit for Off-Grid and On-Grid Energy Storage

Offers cost-effective, high-performance energy storage for both off-grid and on-grid applications, delivering unparalleled safety, longevity and capacity.

BAKERSFIELD, FRESNO, UNITED STATES, June 20, 2024 /EINPresswire.com/ -- All Things Off Grid, a leading provider of off-grid living products and solutions, is proud to introduce its latest innovation: the ATOG [DIY ESS Battery Kit](#). This groundbreaking product offers a cost-effective, high-performance energy storage solution for both off-grid and on-grid applications, delivering unparalleled safety, longevity, and capacity.

In response to the growing demand for sustainable and reliable energy storage options, All Things Off Grid has leveraged cutting-edge battery technology to develop a DIY kit that empowers homeowners and off-grid enthusiasts to build their own customized battery systems. The ATOG DIY ESS Battery Kit is designed to provide a superior alternative to traditional off-the-shelf solutions, offering a compelling combination of affordability, safety, and performance.

"We recognized the need for a more accessible and cost-effective energy storage solution that doesn't compromise on quality or safety," said Rancher Pete, Founder of All Things Off Grid. "Our ATOG DIY ESS Battery Kit represents a game-changing innovation, delivering unmatched value and performance to those seeking energy independence and self-sufficiency."

At the heart of the ATOG DIY ESS Battery Kit is the highest grade lithium iron phosphate (LFP)

cells, renowned for its exceptional safety and longevity. Unlike traditional lithium-ion batteries, LFP technology virtually eliminates the risk of thermal runaway, providing peace of mind for homeowners and off-grid enthusiasts alike.

In addition to its superior safety profile, the ATOG DIY ESS Battery Kit boasts an industry-leading cycle life, sized and priced to be multiple times larger than competing off the shelf solutions, easily providing 30+ years of usable life.

"We've engineered our ATG Power Cell [DIY Battery Kit](#) to be a long-term investment in energy independence," explained Rancher Pete. "By offering exceptional capacity at an affordable cost, our packs provide unparalleled longevity, empowering users to maximize their return on investment while minimizing the need for frequent battery replacements."

One of the standout features of the ATG Power Cell DIY Battery Kit is its modular design, allowing users to easily scale their energy storage capacity to meet their evolving needs. Each kit includes multiple battery cells that can be combined to create a customized system, ensuring a perfect fit for any off-grid or on-grid application. All components are custom made to accommodate the needs of individual customers, all the while offering a far lower cost of ownership versus existing products on the market.

Designed with ease of installation in mind, the ATOG DIY ESS Battery Kit features a user-friendly, plug-and-play setup process. Comprehensive instructions and color-coded connections guide users through every step, ensuring a seamless integration with existing or new off-grid power systems.

Safety remains a top priority for All Things Off Grid, and the ATOG DIY ESS Battery Kit incorporates quality cell balancing systems to ensure optimal performance and protection. These systems eschew the use of poor quality BMS units with consumer grade PCBs that fail repeatedly over time, safeguarding against potential hazards and extending the overall lifespan

of the battery system.

"We're thrilled to offer this innovative solution to the public," said Rancher Pete. "Our ATOG DIY ESS Battery Kit represents a significant step forward in making cutting-edge energy storage technology accessible and affordable for homeowners and off-grid enthusiasts alike."

All Things Off Grid is committed to guiding customers through the process of implementing these advanced battery systems, with comprehensive installation support to assist with complex projects. The company's website features a range of resources, including instructional videos, equipment specifications, and resources for a smooth and successful installation process of its [off grid energy storage](#) systems.

All Things Off Grid

With the launch of the ATOG DIY ESS Battery Kit, All Things Off Grid solidifies its position as a leader in the off-grid and sustainable living movement. By offering a cost-effective, high-performance, and safe energy storage solution, the company empowers individuals to take control of their energy needs while contributing to a more sustainable future.
