The industry's growth is anticipated to reach a value of \$14.4 billion by 2030, having contributed \$6.1 billion in 2021. This research report provides a detailed analysis of various aspects of the market including development trends, key investment opportunities, value chain analysis, regional outlooks, and the competitive landscape.

Gaming Accessories Market Global Opportunity Analysis and Industry Forecast, 2021-2030

“

The gaming accessories market is driven by new high-graphic game content and adults pursuing gaming as a career, offering significant growth opportunities.”

*Allied Market Research*

The report further offers a comprehensive assessment of the global industry, delving into the factors expected to drive market growth. It utilizes effective analytical tools such as Porter's Five Forces model or SWOT analysis to evaluate the competitive scenario and internal potential of organizations. AMR's study serves as a valuable resource for businesses and stakeholders, aiding in the formulation of business strategies, assessment of competitive environments, evaluation of market positions, and informed decision-making to achieve their objectives.

□ □□□ □□ □□□□□□□□ □□□□□□

The recent trends in gaming accessories have been shaped by advancements in technology, improvements in user experience, and growing demands for customization and immersion. In the following, the report outlines notable developments in this field.

□□□□□□□□ □□□□□□ □□□□□□□□□□□□

Recent advancements in wireless technology for gaming peripherals, such as mice, keyboards, and controllers, are being driven by the increasing popularity of wireless gaming. This trend has led to significant improvements, including reduced latency and longer battery life. For example, products like the Logitech G Pro X Superlight mouse and the SteelSeries Arctis 9 wireless gaming headset showcase the latest innovations in wireless gaming peripherals, offering gamers enhanced performance and convenience.

□□□□□□□□□□□□ □□□ □□□□□□□□□□

RGB lighting is now standard in gaming peripherals, enabling users to customize their setups according to their preferences. Companies such as Razer and Corsair provide extensive customization options through their Chroma RGB and iCUE software, respectively.

□□□□-□□□□□□□□□□□□ □□□ □□□□□-□□□□□□□□□□□□ □□□□□□□□□□

Recent advancements in gaming monitor technology include higher resolutions, faster refresh rates, and adaptive sync technologies such as NVIDIA G-Sync and AMD FreeSync. The ASUS ROG Swift PG27UQ is an example of a high-end gaming monitor with 4K resolution and a 144Hz refresh rate.

□□□□□□□ □□□□□□ □□□□ □□□□□□□□□□ □□□□□□□□

Ergonomic gaming chairs with adjustable features and lumbar support are necessary for long gaming sessions. Secretlab's Omega and Titan series are well-known for their comfort and durability.

□□ □□□□□□□□□□□□

Virtual reality gaming is constantly improving the immersive experience with the continuous development of new accessories such as VR gloves, haptic feedback vests, and tracking systems. For instance, the Oculus Quest 2, featuring wireless design and hand tracking, is setting new standards for VR immersion.

## Global Gaming Accessories Market

The global gaming accessories industry is analyzed across major regions, including North America, Europe, Asia-Pacific, and LAMEA (Latin America, the Middle East & Africa). The market in North America dominated in 2021, driven primarily by the surge in online gaming in the United States, supported by faster internet connections. Furthermore, government initiatives to accelerate the rollout of 5G across the country have reduced latency issues, ensuring seamless gaming experiences. Top players such as Microsoft, which depend heavily on revenue from the U.S., are focusing on introducing innovative gaming products. At the same time, various international competitors are reinforcing their foothold in the U.S. market to take advantage of opportunities presented by the gaming industry.

However, the Asia-Pacific region is expected to witness the fastest CAGR throughout the forecast period. The growth is attributed to the rising population of professional gamers, advancements in wireless technologies, and an increase in demand for online gaming.

## Key Players in the Global Gaming Accessories Market

The study further explores the leading players in the global gaming accessories market. AMR conducts a thorough evaluation of these dominant entities in the market to determine their competitive edge. Furthermore, the report offers precise information on their business investments, key profiles, product portfolios, revenue outcomes, and geographical reach.

## Key Players in the Global Gaming Accessories Market:

Plantronics, Inc.  
Cooler Master Technology Inc.  
ZOWIE (BenQ)  
SteelSeries  
Mad Catz  
Logitech International SA  
HyperX  
DuckyChannel International Co., Ltd.  
Corsair  
Razer

To sum up, the AMR report offers an in-depth overview of investment opportunities, development trends, regional outlooks, and the competitive landscape in the global gaming accessories market. This research study is a useful tool for businesses and stakeholders aiming to gain a deep understanding of market dynamics and formulate successful strategies.
