

# Epilepsy Drugs Market Set for Robust Growth, Expected to Reach \$14.03 Billion by 2028

The Business Research Company has updated its global market reports with latest data for 2024 and projections up to 2033

LONDON, GREATER LONDON, UK, June 20, 2024 /EINPresswire.com/ -- The epilepsy drugs market has exhibited strong growth in recent years, with projections indicating continued

expansion. Starting from \$9.59 billion in 2023, the market is forecasted to grow to \$10.34 billion in 2024, reflecting a compound annual growth rate (CAGR) of 7.8%. This growth trajectory can be attributed to advancements in antiepileptic drugs, improved diagnostic techniques, a deeper understanding of epilepsy's neurological basis, increasing demand for epilepsy treatment, and regulatory approvals for new medications.

The epilepsy drugs market size is expected to see rapid growth in the next few years. It will grow to \$14.03 billion in 2028 at a compound annual growth rate (CAGR) of 8%."

Rising Epilepsy Cases Drive Market Growth
The surge in the number of people affected by epilepsy is
expected to propel the epilepsy drugs market forward.
Epilepsy, characterized by recurrent seizures stemming
from abnormal electrical activity in the brain, affects a
diverse demographic, including survivors of traumatic
brain injuries (TBIs), strokes, and other neurological
conditions. Effective epilepsy drugs play a crucial role in
stabilizing brain activity, reducing seizure frequency, and
improving quality of life for patients worldwide. According

to recent reports, approximately 5 million individuals receive an epilepsy diagnosis annually, highlighting the significant global burden of the disorder.
