

Facial Injectable Market Size, Share, Revenue, Trends And Drivers For 2024-2033

The Business Research Company's Facial Injectable Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LONDON, GREATER LONDON, UK, June 20, 2024 /EINPresswire.com/ -- The [facial injectable market size](#) has grown rapidly in recent years, expanding from \$12.45 billion in 2023 to \$13.74 billion

in 2024 at a compound annual growth rate (CAGR) of 10.4%. This growth can be attributed to the increased aging population, heightened consumer awareness, evolving beauty standards, regulatory approvals, and advancements in injection techniques.

The facial injectable market size is expected to see rapid growth in the next few years. It will grow to \$20.50 billion in 2028 at a compound annual growth rate (CAGR) of 10.5%.”

The Business Research Company

Surging Demand for Cosmetic Procedures Fuels Growth in the Facial Injectable Market

The increasing demand for cosmetic procedures is expected to propel the growth of the facial injectable market going forward. Cosmetic procedures refer to medical treatments or interventions that aim to enhance one's appearance with minimal disruption to the body's natural structure. Typically less invasive than traditional surgeries and often performed on an outpatient basis, these procedures are rising in demand due to increasing societal emphasis on appearance, advancements in medical technology making procedures safer and more

accessible, and a growing desire for self-improvement and confidence enhancement. Facial injectables, such as botulinum toxin and dermal fillers, are used in cosmetic procedures to temporarily reduce wrinkles, add volume to certain areas, and enhance facial contours.
