

Global Immunomodulator Market Size, Share And Growth Analysis For 2024-2033

*The Business Research Company's
Immunomodulator Global Market Report
2024 – Market Size, Trends, And Global
Forecast 2024-2033*

LONDON, GREATER LONDON, UK, June 20, 2024 /EINPresswire.com/ -- The [global immunomodulator market](#) has shown strong growth in recent years, expanding from \$204.37 billion in 2023

to \$219.94 billion in 2024 at a compound annual growth rate (CAGR) of 7.6%. This growth can be attributed to advancements in healthcare infrastructure, increased patient awareness, an aging population, a higher incidence of autoimmune diseases, and the introduction of biologic drugs.

“

The immunomodulator market size is expected to see strong growth in the next few years. It will grow to \$297.15 billion in 2028 at a compound annual growth rate (CAGR) of 7.8%. ”

Immunomodulator Global Market Report 2024 :
Market Size, Trends, And Global Forecast 2024-2033

The [immunomodulator market](#) is expected to continue its upward trend, projected to reach \$297.15 billion by 2028 at a CAGR of 7.8%. The forecast period's growth is driven by patient preference for non-invasive treatments, regulatory approvals and guidelines, extensive health insurance coverage, progress in immunomodulatory drugs, and increased government healthcare expenditure.

Rise In Chronic Diseases Fueling The Growth Of The Immunomodulator Market

The rise in chronic diseases is expected to propel the growth of the immunomodulator market. Chronic diseases

are long-lasting medical conditions that typically develop gradually and persist over extended periods, often lasting for years or even a lifetime. Factors contributing to the increase in chronic diseases include an aging population, lifestyle choices, genetic predispositions, and the availability and infrastructure of healthcare. Immunomodulators provide valuable therapeutic options for managing chronic diseases by modulating immune responses, reducing inflammation, preventing organ rejection, enhancing immune surveillance, and improving symptom control.
