Digestive Disorder Incidence Fuels Growth in the Incontinence and Ostomy Care Products Market

The increasing incidence of digestive disorders is expected to propel the growth of the incontinence and ostomy care products market moving forward. Digestive disorders encompass a range of medical conditions affecting the gastrointestinal (GI) tract, including gastroesophageal reflux disease (GERD), irritable bowel syndrome (IBS), and inflammatory bowel disease (IBD). Factors such as changes in diet, lifestyle, stress levels, and environmental factors contribute to the rise in digestive disorders. Incontinence and ostomy care products are essential for managing symptoms like fecal or urinary incontinence, particularly

post-surgery or in severe cases.
