

# Medical Bed Market to Reach \$5.44 Billion by 2028, Driven by Growing Aging Population and Chronic Diseases

*The Business Research Company's Medical Bed Global Market Report 2024 – Market Size, Trends, And Market Forecast 2024-2033*

LONDON, GREATER LONDON, UK, June 20, 2024 /EINPresswire.com/ -- The medical bed market is experiencing significant growth. It is projected to surge from \$3.82 billion in 2023 to \$4.11 billion in 2024, reflecting a robust compound annual growth rate (CAGR) of 7.7%. This growth can be attributed to several factors, including an expanding aging population, the rising prevalence of chronic diseases, advancements in healthcare infrastructure, and increasing healthcare expenditure.

Chronic Disease Hospital Admissions Drive Market Growth

The growing number of hospital admissions due to chronic diseases is a key driver propelling the medical bed market. Medical beds play a vital role in providing patients with the necessary care and support during hospital stays, enhancing their comfort, safety, and overall medical management. For instance, in September 2021, the

Centers for Disease Control and Prevention (CDC), a US-based health agency, reported that approximately 5.2% of emergency department visits by adults with chronic conditions resulted in hospital admission. This figure contrasted with 11.2% for those with one chronic condition, 18.3% for those with two, and a concerning 29.7% for those with three or more chronic conditions. The CDC data revealed that the percentage of hospital admissions due to chronic diseases increased with age and the number of chronic conditions present. This trend highlights the growing demand for medical beds as chronic diseases become more prevalent.
