

Complement 3 Glomerulopathy Market Size in the 7MM was ~USD 35 million in 2023, analyzed DelveInsight

Complement 3 Glomerulopathy companies are ChemoCentryx, Novartis Pharmaceuticals, Omeros Corporation, Apellis Pharmaceuticals, Arrowhead Pharmaceuticals, more.

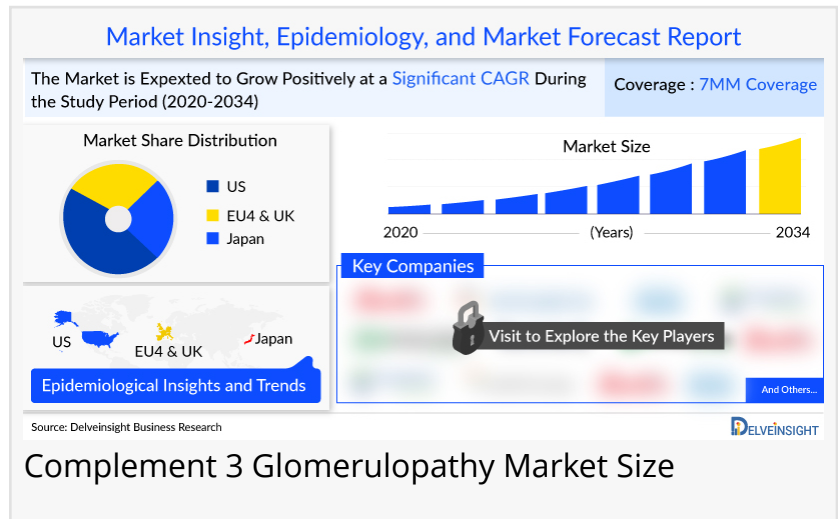

ALBANY, NEW YORK, UNITED STATES, June 20, 2024 /EINPresswire.com/ -- DelveInsight's "Complement 3 Glomerulopathy Market Insights, Epidemiology, and Market Forecast-2034" report delivers an in-depth understanding of Complement 3 Glomerulopathy, historical and forecasted epidemiology as well as the Complement 3 Glomerulopathy market trends in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom), and Japan.

The Complement 3 Glomerulopathy market report provides current treatment practices, emerging drugs, the market share of the individual therapies, and the current and forecasted Complement 3 Glomerulopathy market size from 2020 to 2034, segmented by seven major markets. The Report also covers current Complement 3 Glomerulopathy treatment practice/algorithm, market drivers, market barriers, and unmet medical needs to curate the best opportunities and assesses the underlying potential of the Complement 3 Glomerulopathy market.

Some facts of the Complement 3 Glomerulopathy Market Report are:

- According to DelveInsight, Complement 3 Glomerulopathy market size is expected to grow at a decent CAGR by 2034.
- Leading Complement 3 Glomerulopathy companies working in the market are ChemoCentryx, Novartis Pharmaceuticals, Omeros Corporation, Apellis Pharmaceuticals, Arrowhead Pharmaceuticals, and others.
- Key Complement 3 Glomerulopathy Therapies expected to launch in the market are

pegcetacoplan (APL-2), iptacopan (LNP023), ARO-C3 and others.

- On May 2024, Novartis announced results of a Multicenter, Randomized, Double-blind, Parallel Group, Placebo-controlled Study to Evaluate the Efficacy and Safety of Iptacopan (LNP023) in Complement 3 Glomerulopathy.
- On May 2024, Q32 Bio Inc announced results of a Phase 2 Study to Evaluate the Safety, Pharmacodynamics, Pharmacokinetics, and Clinical Activity of ADX-097 Administered Subcutaneously in Male and Female Participants Aged 18 Years or Older With IgAN, LN, or C3G.
- On March 2024, Apellis Pharmaceuticals announced results of an Open-Label, Nonrandomized, Multicenter Extension Study to Evaluate the Long-term Safety and Efficacy of Pegcetacoplan in Patients With C3 Glomerulopathy or Immune-Complex Membranoproliferative Glomerulonephritis.

Complement 3 Glomerulopathy Overview

Complement 3 Glomerulopathy (C3G) is a rare and serious kidney disorder characterized by abnormal activation of the complement system, leading to inflammation and damage in the glomeruli, the filtering units of the kidneys. It is caused by dysregulation of the alternative pathway of the complement system, resulting in excessive deposition of complement component C3 within the glomeruli. This deposition leads to glomerular injury, proteinuria (excessive protein in the urine), hematuria (blood in the urine), and progressive loss of kidney function. C3G encompasses two main subtypes: dense deposit disease (DDD) and C3 glomerulonephritis (C3GN), each with distinct histological features. Diagnosis typically involves kidney biopsy and specialized laboratory testing to evaluate complement levels and function. Treatment options are limited and often focus on managing symptoms and slowing disease progression, although research into targeted therapies aimed at modulating the complement system is ongoing. Early detection and intervention are crucial for improving outcomes in individuals with C3G.

Complement 3 Glomerulopathy Market

The Complement 3 Glomerulopathy market outlook of the report helps to build a detailed comprehension of the historical, current, and forecasted Complement 3 Glomerulopathy market trends by analyzing the impact of current Complement 3 Glomerulopathy therapies on the market and unmet needs, and drivers, barriers, and demand for better technology.

This segment gives a thorough detail of the Complement 3 Glomerulopathy market trend of each marketed drug and late-stage pipeline therapy by evaluating their impact based on the annual cost of therapy, inclusion and exclusion criteria, mechanism of action, compliance rate, growing need of the market, increasing patient pool, covered patient segment, expected launch year, competition with other therapies, brand value, their impact on the market and view of the key opinion leaders. The calculated Complement 3 Glomerulopathy market data are presented

with relevant tables and graphs to give a clear view of the market at first sight.

According to DelveInsight, the Complement 3 Glomerulopathy market in 7MM is expected to witness a major change in the study period 2020-2034.

Complement 3 Glomerulopathy Epidemiology

The Complement 3 Glomerulopathy epidemiology section provides insights into the historical and current Complement 3 Glomerulopathy patient pool and forecasted trends for seven individual major countries. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. This part of the Complement 3 Glomerulopathy market report also provides the diagnosed patient pool, trends, and assumptions.

Complement 3 Glomerulopathy Drugs Uptake

This section focuses on the uptake rate of the potential Complement 3 Glomerulopathy drugs recently launched in the Complement 3 Glomerulopathy market or expected to be launched in 2020-2034. The analysis covers the Complement 3 Glomerulopathy market uptake by drugs, patient uptake by therapies, and sales of each drug.

Complement 3 Glomerulopathy Drugs Uptake helps in understanding the drugs with the most rapid uptake and the reasons behind the maximal use of new drugs and allows the comparison of the drugs based on Complement 3 Glomerulopathy market share and size, which again will be useful in investigating factors important in market uptake and in making financial and regulatory decisions.

Complement 3 Glomerulopathy Pipeline Development Activities

The Complement 3 Glomerulopathy report provides insights into different therapeutic candidates in Phase II, and Phase III stages. It also analyses Complement 3 Glomerulopathy key players involved in developing targeted therapeutics.

Complement 3 Glomerulopathy Therapeutics Assessment

Major key companies are working proactively in the Complement 3 Glomerulopathy Therapeutics market to develop novel therapies which will drive the Complement 3 Glomerulopathy treatment markets in the upcoming years are ChemoCentryx, Novartis Pharmaceuticals, Omeros Corporation, Apellis Pharmaceuticals, Arrowhead Pharmaceuticals, and others.
