The increasing number of hospital admissions is a major factor propelling the patient flow management solutions market. These solutions optimize patient movement within healthcare facilities, improving efficiency and reducing wait times. For instance, the National Health Service (NHS), a UK-based government department, reported a 4.8% rise in hospital admissions due to smoking in 2022-23 compared to the previous year. As hospital admissions rise, so does

the demand for patient flow management solutions.
