Increasing Prevalence of ADHD Drives Market Growth

The increasing prevalence of attention-deficit hyperactivity disorder (ADHD) is a significant factor contributing to the growth of the ADHD therapeutics market. ADHD therapeutics aim to improve symptom management, functional impairment, quality of life, and overall well-being for individuals affected by ADHD. For instance, in January 2023, reports published by the Guardian indicated that an estimated 170,000 identified patients were prescribed ADHD medication in 2022, marking a 20.4%

increase from the 141,000 identified patients in 2021. Therefore, the rising prevalence of ADHD is propelling the growth of the ADHD therapeutics market.

Major Players and Market Trends

[Major companies operating in the ADHD therapeutics market](#) include Pfizer Inc., Johnson And Johnson Services Inc., Novartis AG, GlaxoSmithKline plc, and Takeda Pharmaceutical's. These companies are focusing on digital advancements such as over-the-counter (OTC) versions of digital therapeutics to meet the increased demand for remote healthcare solutions. For example, in June 2023, Akili launched an OTC version of its video game-based digital therapeutic, EndeavorOTC, aimed at improving attention and organizational skills in adults with ADHD. This move follows the success of Akili's FDA-authorized prescription video game treatment, EndeavorRx, for children with ADHD.
