

Sirko International partners with Three Rivers Firearms to distribute MyShield

ROME, GEORGIA, USA, June 21, 2024 /EINPresswire.com/ -- Sirko International, the authorized reseller and integrator of [MyShield](#), successfully incorporated MyShield into the security system of Three River Firearms and partners with Three River Firearms to distribute MyShield to firearm owners.

"Combining MyShield's proactive intervention with Three River Firearms existing security system will provide Three River Firearms with an additional layer of security and safety," said Jonathan Sirko, CEO of Sirko International.

MyShield is the first all-in-one, LTE-M-connected intruder detection and intervention security fog generator system. It is a standalone app-based solution connected to cellular IoT networks, which can also be integrated into existing security and monitoring systems. The award-winning proprietary security fog generator fills a room with a veil of harmless yet disorienting fog within seconds, quickly forcing intruders off premises before they can cause harm to people or properties. Easy-to-install, the battery-powered system includes an integrated passive infrared motion (PIR) detector, high-definition video camera with recording capabilities, and two-way voice communication to ensure verification prior to deployment.

Impressed by MyShield and recognizing the added security value of fog, Steve Loyd, the owner of Three River Firearms, has become a reseller for Sirko International to extend this value to his customers.

"We are thrilled to introduce MyShield at Three Rivers Firearms," expressed Steve Loyd, the owner of Three Rivers Firearms. "In today's climate, customers are actively searching for ways to safeguard their firearm investments at home. I am enthusiastic about providing a solution to help our customers protect their valuable investments."

About Sirko International
