ABOUT THIRST PROJECT

Thirst Project is a nonprofit organization that works with the support of young people to end the global water crisis by building freshwater wells in developing communities that need safe, clean drinking water. Why Water? Health and Sanitation: Waterborne diseases are responsible for more easily preventable young deaths a year than HIV, Malaria, and all world violence combined. Small children typically do not have strong enough immune systems to fight diseases like cholera, dysentery, or schistosomiasis. *Data sourced from the UN
